SERIES III
VOLUME VI

FOREWORD

The CHERRY TREE gathers into unity the diverse activities and interests of the University as does no other instrumentality. We can but offer the hope that the present issue has fulfilled the trust which is for that reason imposed upon it.

THE
BOARD of EDITORS

University Calendar

1912.

JUNE 5, *Wednesday*—University Commencement.

SUMMER VACATION.

SEPTEMBER 25, *Wednesday*—Academic Year begins in all Departments of the University.

OCTOBER 9, *Wednesday*—Stated meeting of the Board of Trustees.

OCTOBER 21, *Monday*—Last day for registration for the first term without late-registration fee.

NOVEMBER 28-30, *Thursday* to *Saturday*, both inclusive—Thanksgiving recess.

RECESS FROM DECEMBER 23, TO JANUARY 2, 1913, BOTH INCLUSIVE.

1913.

JANUARY 8, *Wednesday*—Stated meeting of the Board of Trustees.

JANUARY 27, *Monday*—Last day on which dissertations may be presented.

FEBRUARY 3, *Monday*—Second Term begins.

FEBRUARY 10, *Monday*—Doctorate Disputation.

FEBRUARY 20, *Thursday*—Last day for registration for the second term without late-registration fee.

FEBRUARY 22, *Saturday*—A holiday in all Departments of the University.

MARCH 21-24, *Friday* to *Monday*, both inclusive—Easter holidays.

APRIL 8, *Tuesday*—Davis Prize Speaking.

MAY 1, *Thursday*—Last day on which dissertations may be presented.

MAY 19, *Monday*—Doctorate Disputation.

MAY 20-23, *Tuesday* to *Friday*—Examinations for admission.

MAY 30, *Friday*—A holiday in all Departments of the University.

JUNE 4, *Wednesday*—Annual meeting of the Board of Trustees.

JUNE 8, *Sunday*—Baccalaureate Sermon.

JUNE 11, *Wednesday*—University Commencement.

TO

Charles Edward Munroe

This Volume is Dedicated in Earnest
and Grateful Appreciation of His
Wise Direction Both In and
Out of the Class Room

CHARLES EDWARD MUNROE

CHARLES EDWARD MUNROE

DEAN OF THE GRADUATE SCHOOL

 HARLES EDWARD MUNROE, son of Enoch and Emeline (Russell) Munroe, and Professor of Chemistry and Dean of Graduate Studies in George Washington (formerly Columbian) University since 1892, was born at Cambridge, Massachusetts, May 24, 1849. After the usual course of studies in the Cambridge High School, he entered the Lawrence Scientific School of Harvard University, where he graduated with the degree of B.S. in 1871. At the Scientific School he had as his master the foremost American chemist in his day, Professor Wolcott Gibbs. For about three years after graduation he was assistant in chemistry in Howard College under Professor J. P. Cooke, and from 1874 to 1886 he was Professor of Chemistry in the U. S. Naval Academy. From 1886 to 1892 he was chemist of the Torpedo Station at Newport, R. I., and also took part in the work of the Naval War College. In addition to these principal occupations he has had charge of U. S. Census work on chemical industries, and has done much work on explosives for the United States Government, and especially in recent years for the U. S. Geological Survey and Bureau of Mines. He also served in 1885, 1890 and 1893 on the Annual Assay Commission, and in 1898 was one of the Board of Visitors to the Naval Academy.

Professor Munroe has been active in many scientific organizations, and has received signal honors from them. In 1888 he was a Vice President of the American Association for the Advancement of Science, and President in 1898 of the American Chemical Society. He is also a member of the American Academy of Arts and Sciences, the American Philosophical Society, the Washington Academy, the London Chemical Society, and the Deutsche Chemische Gesellschaft. He is now President of the Cosmos Club. By the Sultan of Turkey he was decorated as Commandant of the Order of Medjidje, and he has received honorary degrees from the George Washington University. In 1883 he married Mary Louise Barker, daughter of the late Professor George J. Barker, and has several children.

Professor Munroe is recognized as the foremost American authority on the chemistry of explosives, a subject upon which he has published many papers and some important bibliographies. He invented a smokeless powder for the use of our Government, and introduced into chemistry the use of porous cones for purposes of filtration. These cones preceded the Gooch crucible, which, in turn, he improved by substituting a platinum sponge for the usual felt or asbestos. His scientific activities have been many and various.

REAR ADMIRAL CHARLES HERBERT STOCKTON
President of the University

The Board of Trustees

CHARLES HERBERT STOCKTON, LL. D.

President of the University, and Ex-officio Member of the Board

1913.

College of Engineering and Mechanic Arts.*

CHARLES EDWARD MUNROE, Ph. D., LL. D.

Dean of the School of Graduate Studies.

WILLIAM ALLEN WILBUR, A. M.

Dean of Columbian College.

CHARLES WILLIAM AUGUST VEDITZ, LL. B., Ph. D.

Acting Dean of the College of the Political Sciences.

WILLIAM CARL RUEDIGER, Ph. D.

Dean of the Teachers College.

CHARLES NOBLE GREGORY, A. M., LL. D.

Dean of the Department of Law.

WILLIAM CLINE BORDEN, M. D.

Dean of the Department of Medicine.

JOHN ROLAND WALTON, D. D. S.

Dean of the Department of Dentistry.

HENRY E. KALUSOWSKI, Phar. D.

Dean of the National College of Pharmacy.

DAVID EASTBURN BUCKINGHAM, V. M. D.

Dean of the College of Veterinary Medicine.

CHARLES W. HOLMES

Treasurer of the University.

RICHARD COBB, A. B.

Secretary of the University.

In Memoriam

Williston Samuel Hough

1849--1912

WILLISTON SAMUEL HOUGH

THE sudden death of Dean Hough, of Teachers College, occurred but a few days prior to the opening of the present term of the University. The sad tidings fell like a thunderbolt from a clear sky upon the teachers and students of all the departments of the University, and particularly upon those of Teachers College, whose extreme fortune it was to be honored by his association, friendship, instruction, and supervision. During his comparatively short affiliation with the college—seven years—he gained the love and reverence of the Faculty and of the students, most of whom are the teachers, principals and supervisors of the schools of this city.

Williston Samuel Hough was fifty-one years of age at the time of his death. He was born in Williston, Vt., where he received his earlier education. His first college degree of Ph. D. was conferred upon him by the Michigan Agricultural College when he was twenty-one. For the next three years he pursued post-graduate studies at the University of Michigan, where he obtained his Master's degree. He then went to Europe, where he studied at the Universities of Heidelberg, Halle, Berlin, Paris and Oxford, and in 1888, upon his return to this country, he became instructor of philosophy at the University of Michigan. From 1889 to 1894 he served first as assistant and later as professor of philosophy at the University of Minnesota. For six years more he again studied at Oxford and Berlin, doing research work in the history of philosophy and devoting much time to literary work. He first became connected with the George Washington University in 1907 as professor of psychology and education in charge of the education department. On June 1, 1909, he was made dean of Teachers College, which owes much of its success to his untiring effort and constant devotion.

He was a member of many of the learned societies of the country, such as the American Philosophical Association, National Association of College Teachers of Education, Southern Society of Psychology and Philosophy and Federal Schoolmen's Club (president 1911-12). He was a fellow of the A. A. A. S. His name appears upon the membership books of the Cosmos, University and Chevy Chase Clubs.

Professor Hough enjoyed an excellent literary career. He was the translator of "A Critique of Kant" (from the German of Kuno Fischer), in 1888, and, in 1909, in collaboration with Professor W. R. Royce, he translated Rudolf Eucken's great German work on "The Problem of Human Life as Viewed by the Great Thinkers from Plato to the Present Time." He was the editor of Erdmann's History of Philosophy (three volumes) in 1890; third edition in 1898. He contributed frequently to many magazines and periodicals on philosophy and education.

To those who knew him his merits need no lauding. His deep learning, his gentle modesty, his broad sympathies, his unfailing courtesy, and high sense of justice will never be forgotten by them.

THE UNIVERSITY

GEORGE WASHINGTON UNIVERSITY has an historic past which would be the pride of any institution, and its study is the privilege and the duty of every student. An urban university rarely has the conditions favorable to the growth of academic traditions. These generally cluster around some particular building or spot on the campus, and are commemorated by observances for which the privacy of the campus gives free opportunity for development. The college located in the city, and especially in the heart of the city, must be prepared to surrender much of its custom and tradition, from the very necessities of its situation. The freedom of a campus in the business section of a city is out of the question. The concrete expressions of college spirit and undergraduate animation are apt to fall afoul of the Metropolitan Police. So George Washington has from its situation lost much of its student life, and much of the tradition and custom that serves to commemorate the history of an institution.

The idea of a national university at the National Capital dates from the beginning of our country's history. George Washington in his will set aside a large sum of money for the founding of such an institution, and pictured his dream of the new city on the Potomac as a center of a broad, national culture. Thomas Jefferson, who drew up the first plan for the educational system of the District of Columbia, outlined three branches or stages of public education: the primary school, the academy, and a university. Congress doubted its authority under the Constitution to establish such a university, and took no action at the time. To this day the bequest has not been fulfilled.

The beginning of the present George Washington University can be traced back to the year 1819, when Luther Rice, a Baptist minister, impressed by the splendid opportunities afforded to a college in the National Capital, set about energetically soliciting subscriptions from all classes of people all over the United States for the foundation of a college. By the aid of President Monroe a charter was secured from Congress in 1821 for the establishment of "The Columbian College in the District of Columbia," for the "sole and exclusive purpose of educating youth in the English, learned, and foreign languages, the liberal arts, sciences, and literature," and with power to confer all degrees usually conferred by institutions of collegiate rank. The broad principles on which our University was founded are sufficiently indicated by a provision in our original charter to the effect that "persons of all religious denominations shall be capable of being elected trustees, nor shall any person, either as president, professor, tutor, or pupil, be refused admittance into said college or denied any of the privileges, immunities, or advantages thereof, for or on account of his sentiments in matters of religion."

A tract of land on what is now known as Columbia Heights was purchased with the money raised by Luther Rice through subscriptions, and a college building was completed in 1822. Among the noted Americans and Britons who contributed to the fund were John Quincy Adams, William F. Crawford, John C. Calhoun, the Chancellor of the Exchequer, the Bishop of Durham, Lord Ashburton, Sir James Mackintosh, as well as a number of members of Congress and other distinguished people.

The formal opening of the College took place on January 9, 1822, with the Rev. William Staughton as president, and thirty-nine students in attendance. Only the theological and classical departments were opened at this time. Within the next five years, however, the law, medical, philosophical, and preparatory departments were opened in rapid succession. The first commencement took place on December 15, 1824, when three men were graduated, before President Monroe, General Lafayette, the Secretaries of State, War, and Navy, and leading members of both houses of Congress.

The College showed a steady increase in the number of its students, and as early as 1824 had on its rolls 150 students, representing twenty-one out of the twenty-four States. This number has increased within the past few years to a maximum in the neighborhood of 1,500 students, representing every State and Territory in the Union, as well as a dozen or more foreign countries.

Columbian College owed its life and prosperity to the continued and unremitting efforts of Luther Rice, who before his death in 1836 secured for it nearly one hundred and fifty thousand dollars by subscriptions from practically every State in the Union. Later, John Withers, of Virginia, contributing from time to time, gave a total of nearly seventy thousand dollars. Congress, during the first administration of President Jackson, appropriated lots worth twenty-five thousand dollars to Columbian and a like amount to Georgetown. This was the only money that the institution has ever received from the Government.

As was the case in so many institutions, particularly in the South, the Civil War practically suspended classes in Columbian College. A large proportion of the students, Southern Baptists, went to fight in the armies of the Confederacy, and many fought in the armies of the Union. The College buildings were used by the Government for hospital purposes. When the war was over a few students drifted back to take up their studies, and Columbian College resumed its task of educating the youth of the District.

In this period of its fortunes Columbian College owed a deep debt of gratitude to the benefactions of Mr. W. W. Corcoran, who contributed liberally to the work of the institution. By act of Congress the name of the College was changed in 1873 to the Columbian University, and the Board of Trustees was made self-perpetuating. Beginning with 1879 the transformation of the institution from a suburban college to a city university began. The Trustees came to the conclusion that Columbian must be removed to the center of the city in order to hold the students, and the piecemeal sale of the College Hill property was commenced. Mr. Corcoran offered the University the lot on

which the present Arlington Hotel is situated, but as the land in question was considered too small, Mr. Corcoran was induced to permit the sale of his gift and the reinvestment in cheaper lands. The Harris property, at Fifteenth and H streets, previously the site of a club house, was purchased, and a building, considered at the time one of the most up-to-date college buildings, was begun in 1883. During the following school year the removal to the heart of the city was effected. In the Fifteenth street building were located the classical and law departments, and the newly-founded Corcoran Scientific School. The old Law Building was erected in 1898, and occupied by the departments of law and diplomacy.

By act of Congress and with the approval of the Secretary of the Interior and the United States Commissioner of Education the name of the institution was changed in 1904 to The George Washington University.

It became evident that the property at Fifteenth and H streets was too valuable a piece of land to be utilized economically for college purposes, and it was sold to S. W. Woodward for \$450,000. The Colleges of Arts and Sciences, Engineering and Mechanic Arts, and the Teachers College were removed to a row of six buildings on I street between Fifteenth and Sixteenth streets, occupied by the University, and the Division of Architecture was dropped.

The money from the sale of the University property was applied to the indebtedness of the institution with such results that the University was soon freed from debt and steps were taken to restore the endowment to its former figure. Under the wise and economical management of President Charles Herbert Stockton, Rear Admiral U. S. N., retired, the expenses of the University have been reduced to a minimum, and it is due to his efforts that the University is now on its feet. The University is now free from debt, and its income for the next five years has been fully assured.

Formal notice was served on the first of February, last year, by the Arlington Hotel Company that the I street building would be torn down to make room for a larger hotel, and must be vacated by May 1. Shortly after it was announced that the University had leased the former home of the St. Rose Industrial School at 2023 G street N. W. Preparations were made to move the Department of Arts and Sciences and the University offices during the academic term, and by granting a week of extra holiday at Easter the removal was effected so smoothly that classwork was resumed without interruption on April 15. The building has been thoroughly remodeled and renovated for college purposes, and has proved remarkably well suited to our needs.

The total registration this year has exceeded thirteen hundred, and the Faculty numbers approximately two hundred. All departments of the University are well equipped to give thorough training, and the opportunities for original research cannot be surpassed. In addition to the well-stocked University Library, the student has at his command the Library of Congress, comprising more than two million volumes, and Congress has by special enactment made the various scientific libraries and collections of the Government open to him for special research.

JULIA THEKLA MACMILLAN, S. M.....	Instructor in Zoology
WILLIAM WRIGHT FRASER, A. B., B.L.....	Lecturer in Mathematics
ALTON LEWIN KIBLER, Ph. D.....	Instructor in Chemistry
WILLIAM JETT LAUCK, A. B.....	Lecturer on Economic Aspects of Immigration
CHARLES EDWIN VAN OSTRAND, S. M.....	Lecturer on Mechanics
HARVEY LINCOLN CURTIS, Ph. D.....	Lecturer on Physics
MARIETTA STOCKARD.....	Lecturer on Education

The Department of Arts and Sciences

THE Department of Arts and Sciences is directly the development of the old Columbian College. Its administration is divided into five schools, the School of Graduate Studies, the Columbian College, the College of Engineering and Mechanic Arts, the College of the Political Sciences, and the Teachers College. Hitherto the President of the University has acted as Dean of the Department, but with the growth in the amount of business requiring his attention, it was this year found necessary to choose another member of the Faculty to act in this capacity. Accordingly, Dr. Howard Lincoln Hodgkins, Dean of the College of Engineering and Mechanic Arts, was chosen for the position.

The School of Graduate Studies, under the administration of Dean Charles Edward Munroe, Ph.D., has supervision of courses in the University leading to the higher degrees. It confers in course the degrees of Master of Arts (A.M.), Master of Science (M.S.), Civil Engineer (C.E.), Mechanical Engineer (M.E.), Electrical Engineer (E.E.), and Doctor of Philosophy (Ph.D.).

The Columbian College, headed by Dean William Allen Wilbur, A.M., is the academic school, and is the representative of the old Columbian College, organized in 1821. In 1903 its name was changed to the College of Arts and Sciences. In 1912 it was again given the name of the Columbian College. It confers the undergraduate degrees of Bachelor of Arts (A.B.) and Bachelor of Science in Chemistry (B.S. in Chem.).

The College of Engineering and Mechanic Arts, headed by Dean Howard Lincoln Hodgkins, Ph. D., offers the undergraduate engineering courses. In 1884 this college was established in the university under the name of the Corcoran Scientific School, which was in 1904 changed to the present name. It confers the undergraduate degrees of Bachelor of Science in Civil Engineering (B.S. in C.E.), in Mechanical Engineering, (B.S. in M.E.), Electrical Engineering (B.S. in E.E.), and in Architecture (B.S. in Arch.).

At the end of the present session the College of Political Sciences will be discontinued as a separate administrative division, but most of the work will be continued under the administrative direction of Columbian College. After many vicissitudes in the way of a building which would at the same time be comfortably large and convenient to the central part of the city, the Department is now housed in a building which is in every way suitable. It is to be hoped that this will form the nucleus for the establishment of a campus surrounded by all of the buildings of the University.

Post Graduate

FITZHUGH GREEN, $\Phi \Sigma K$U. S. N.

HAROLD KEATS, $\Theta \Delta X$District of Columbia
Candidate for A. M.; A. B., George Washington University, 1912; Pyramid, First Davis Prize, Gardiner Hubbard Prize, Daughters of the American Revolution Prize, 1912; First University Scholarship; Editor of the "Hatchet," 1912-'13; Manager of Track, 1010-'11; Varsity Track Team, 1909, '10, '11, '12; Wearer of the "W"; Class President, 1909-'10; Senior Orator, 1912; Assistant Manager Calcium Club; Girl and Page Chorus; Vice-President Encinian, 1909; Captain Freshman Football Team, 1908; Law School Honor Committee, 1915.

JOHN JOSEPH LENNEY.....Virginia

JOSEPH ADDISON SCOTT, JR.

C LASSES may come and classes may go, but the class of 1913 will be recorded in history as the "lucky class." For has not 1913 made an enviable record during the four years of its life, and does not that record, as a criterion of future prowess, bespeak great things?

Beginning with our Freshman year, when we beat the Sophs at football, we have always been "right there." And let it be remembered that we have excelled not only in the field of brawn, but also in that of brain. We number among our members not only those who have attained distinction in football, basketball and track, but we also lay claim to editors and business managers of student publications, and presidents, vice presidents, secretaries and treasurers of numerous other student organizations. There is hardly a student activity in which our class is not interested.

In four years we have grown from boys and girls to men and women. We have had our share in the work and have tried faithfully to do it. We shall be meeting a far harder set of instructors out in the University of Life, and there will be no "make-up exams." Still we are ready to go.

And now that we have attained the goal for which we have so long striven and are about to receive our long-coveted reward, we feel that college days are all too short. But we know that we have formed many friendships, friendships which will be lasting; and the memory of our college days will be a source of inspiration to us in the years to come when we are engaged in the more serious business of life for which we have been fitting ourselves. We have accomplished much during our brief sojourn at G. W. U. and we feel that there never has been and never will be a class like 1913—called by some "The Hoodoo Class," but more fitly known as "The Class Who Do."

Senior College

CHARLINE APPLEBY Indiana

Charline is a student—at least the results justify that conclusion. She is noted for doing the things that the rest of us find hardest, without half trying. What a list of A's to her credit! Physics, Chemistry, History, Mathematics—all mere pastimes for Charline. Besides all this, Charline is Physics teacher at Belcourt Seminary. Even then she has plenty of time to "set mischief afoot" and we love her no less for her sunny nature than for her depth of mind and heart. Her first two years were spent at De Pauw University.

HENRY GODFREY AVERS Ohio

Mr. Avers' forte is mathematics, and before coming to George Washington he was assistant in the Mathematics Department of Ohio Northern University. That mathematics and musical harmony are closely related is seen in the fact that he is also experienced in leading a college orchestra. A. B.

JAMES EARL BLACK New York

Y. M. C. A.; Calcium Club; Glee Club

Mr. Black is some tall timber, both mentally and physically. There isn't much that he can't reach. He is hoping to be Consul-General at London some day, if mathematics is required in the examination. A. B.

JOHN ALEXANDER BOWMAN, Σ A E
District of Columbia

John left us at the end of his Freshman year to absorb knowledge at Washington and Lee, but, like the cat, he couldn't stay away (the co-eds may be able to tell us why), and so come back to finish at George Washington. The personification of geniality, a magnetic personality; we know he will succeed in his chosen work. A. B.

ISAAC MAURICE BORTMAN Pennsylvania

Member of the Chemical Society

Mr. Bortman, known to many as the "Speed Artist," started in at Temple College, but came to George Washington to complete his studies in chemistry. He is musically inclined, and among his many accomplishments is that of having run an auto thirty miles an hour on the "Primary Circuit."

B. S. in Chem.

Senior College

ALICE BURRITT.....District of Columbia

Alice may always be known by her cheery smile. She is teaching school just now, but of late she has seemed to loose interest in her academic pursuits. Perhaps her knowledge of cooking and domestic science will be of use to her before long. Who knows? We'll all admit that G. W. U. men are the best anyhow.

MINNIE CARTER DAVIS.....Tennessee

Came to G. W. U. from Central with a record which she continued in her Freshman year here. Then the wanderlust took her, and she went to the University of Tennessee for her Sophomore and Junior years. However she decided to take here degree from G. W. U. and with the Class of 1912. Next year she expects to teach in the high school at Knoxville, Tennessee.

RALPH HOSPITAL, © Δ X....District of Columbia Class President 1910-11; Chairman Upper Class Dance Committee 1911-12; Assistant Manager Track 1911-12; "Cherry Tree" Staff 1910-11, 1912-13.

Some men are born bright, others achieve brightness, while still others have brightness thrust upon them. Ralph has a reputation for all three, and, just as in his college days, by his personality and his unceasing labor, he has made one long bright day for himself and his friends, so he will continue to achieve, and even though the path to success may lead to the far side of the globe, our thoughts will follow.

A. B.

EVA PHELPS KELLEY, Σ K.....Nebraska

Our Eva's name might well be "Late." We even expect the Angel Gabriel to wait at least an hour after he has blown the last blast. Her great charm is her low, gurgling laughter when she's decidedly pleased, or surprised. She's quiet, but for a persevering student you can't "beat" her.

KATHARINE KERBY, X Ω...District of Columbia Senior Play Committee.

We have all sometime or other flunked out in class while gazing raptly at Katharine's proud beauty. And when those languorous accents "in linked sweetness long drawn out" fell from those cherry red lips we thought an "E" a cheap price to pay for the privilege. Oh, well-a-day! she's leaving us now. Nevermore shall we hear her sweet tones declaring to Dr. Swisher that all the industrial progress of the last 150 years has been due to women.

Senior College

REX EMIR KINSELL.....Iowa

First Davis Prize

Mr. Kinsell, after attending Drake University and Western Normal College, started out to "teach the young idea how to shoot," but came East to attend George Washington, and, incidentally, win the First Davis Prize.

A. B.

CLARENCE A. KNUDTSON.....Wisconsin

A star in French, and a worthy running mate of Herr Lodholz. When we want to know the meaning of one of "Henning's Delights," we go to Knudtson. Nuf Ced.

HENRY ALBERT LEPPER....District of Columbia

Pyramid; President Chemical Society; Class Treas.; Chairman Banquet Committee; Treasurer Chemical Society 1911-'12; South Atlantic Champion, 100-yard Dash, 1910; Intercollegiate Champion.

Mr. Lepper, familiarly known as "Heinie," or "Dutch," is "one of the world's eminent scientists." (See "Leslie's Weekly.") Heinie has been very busy this year showing the Freshmen how to mix sulphuric acid and water without burning holes in their coats. His favorite amusement is conducting parties to Alexandria and Baltimore.

B. S. in Chem.

ALFRED BRISCOE LINDSAY...District of Columbia

This is our musical member of the class. If Mr. Lindsay does not particularly care for the kind of music he hears, he hies himself to a quiet spot and writes something to suit himself. How the combination of law and music will work is yet to be seen.

A. B.

LOUIS LODHOLZ.....Pennsylvania

Chemical Society

"Our illustrious contemporary" is a man of many parts, great erudition, German descent and extensive vocabulary. Converses fluently in four languages, namely—English, French, German and profane. His tongue is the nearest approach to perpetual motion yet discovered. He is the life of the Chemical Society. Favorite study: E. E. 7. Favorite hobby: Russian dancers. Favorite eating place: Tea Cup Inn. Ambition: To write a treatise on "The Extravagance of the American housewife." Help! Help!!

A. B.

Senior College

LOUIS ARCHER MAXSON.....Maryland
Pyramid; Class President 1912-'13; Chemical Society;
President Y. M. C. A. 1911-'12; Class Treasurer
1910-'11; Track Team.

The boast of the class. A man who has from the Freshman year represented our class in all branches of college activities. The high esteem in which he is held by his classmates was manifested when he was elected as our President by acclamation. Here is wishing you luck, Max; we expect great things of you. A. B.

LULU MIGNONNE McCABE, II B Φ...Kansas
Co-Editor of "Cherry Tree" for Class; Treasurer
Y. W. C. A.; Class Secretary 1911-'12

Miss McCabe joined us in our Sophomore year, coming all the way from Washburn College. She has attained a reputation as an after dinner speaker, impromptu responses to toasts being her specialty. Throughout her college course she has maintained a record for scholarship, her principal diversions being dancing and walking. Our admiration and good wishes go with her to her new field of endeavor.

CHARLES HOLLESTER POTTER...North Carolina
Chemical Society; "Tar Heel" Club

Hark ye! Here comes a "Tar-heel" whose ambition is to rise by "degrees." His next one will be from the Department of Law. Potter's specialty is Chemical Patents. We have heard it said of him that "he has been married since a baby."

MORRIS A. POZEN, Phar. D. . .District of Columbia
Chemical Society; Class Prophet; Class Play Committee; Class Editor for "The Hatchet";
Executive Committee, Chemical
Society, 1910-'11.

"Our eminent colleague" is a great raconteur. Knows every joke, whether already told or still waiting to be told. Is absorbed in such incompatible subjects as Chemistry and Socialism. Is still undecided what to choose, but will probably turn to Socialism, as there are no jokes in Chemistry. B. S. in Chem.

ARTHUR HUBER REDFIELD, Σ Φ Ε
District of Columbia
Pyramid; Dramatic Club; University Scholarship;
Chairman Class Play Committee; 3rd Davis
Prize; First Vice-President Y. M. C. A.;
Editor-in-Chief University "Hatchet"
1911-'12; Treasurer Y. M. C. A.
1911-'12.

The only man who ever took German 5 and was never stumped when questioned concerning classical allusions. When it comes to classics, Reddy, you are right there. A. B.

Senior College

LEILA FORDHAM SCOTT, ΣK , District of Columbia Sphinx; Class Vice-President 1912-'13; Vice-President-Treasurer of Girls' Athletic Association, 1912-'13; Senior Class Pin Committee.

Don't worry—she's not as meek as she looks. To see her "hike" down the street to Chemistry, you'd think she was related to T. R. However, her conquests lie in quite another field. Shades of the Y. M. C. A.! What secrets could ye not disclose! In basket-ball, she towers above every one else, we assure you.

DUNCAN CAMPBELL SMITH, $\Phi \Sigma K$ Maryland Pyramid; Chemical Society; Dramatic Club; Glee Club; Secretary Athletic Association; Track Team; Business Manager the "Cherry Tree"; Class Treasurer 1911-'12; Secretary Chemical Society 1911-'12; Treasurer Y. M. C. A. 1910-'11.

"Smithy" has three other nicknames: "Reds," "Monk" and "Spates." By his sociable nature and ardent support of class et cetera, he has successfully lived down his nickname which he brought from Rockville. B. S. in Chem.

JAMES NORMAN TAYLOR, A B Φ Delaware Treasurer Chemical Society; Class Editor for "Cherry Tree"; President of Class 1911-'12; Vice-President Chemical Society 1911-'12; President Chemical Society 1910-'11; Member of Y. M. C. A., Press Club and Aero Club; Drexel Institute 1906-'07, '07-'08. Gentle reader, draw your own conclusions. B. S. in Chem.

OLIVIA ALEXANDER TAYLOR, ΣK . . Dist. of Col. Sphinx; Class Vice-President, 1910-'11; Treasurer Y. W. C. A., 1910-'11; Class Editor, "Cherry Tree," 1912-'13; Associate Class Editor, 1910-'11; Class Prophet, 1912-'13

"Oats"!—sounds as if she might be quite ferocious, but she's not. She's "modest and sweet as a violet." Her greatest mistake is that of belonging to the "man-hating society." Nevertheless, her list of college activities shows that she is popular.

ARTHUR STOCKTON THATCHER Pennsylvania Vice-President Chemical Society; President Chemical Society 1911-'12; Treasurer Chemical Society 1910-'11; President Junior Class 1910-'11; Drexel Institute 1906-'07, '07-'08.

A rather quiet and retiring chap, with his ears and eyes always open. Fond of Nature and all that goes with the great out-of-doors. Joined the Benedicts in his third year. Si came to us from West Chester, and we wish that we had a lot more like him. It would be a benefit to us all. B. S. in Chem.

Senior College

HILDA LOUISE ULRICKSON, Σ K. . . . Dist. of Col.
 Class Vice-President 1911-'12; Class Secretary
 1912-'13; Treasurer Y. W. C. A. 1911-'12;
 President Y. W. C. A. 1912-'13

The chief thing about her is her voice, whether it is being used in the gentle art of conversation in the library or is soaring to heights sublime in Chapel. George Washington will sadly miss something next year when its walls no longer echo these strains. She not only leads the singing, she leads the girls also as President of Y. W. C. A., but it is whispered that in the near future some one else will lead her—New Englandwards.

HAROLD ELLSWORTH WARNER, B Θ II, Colorado

After attending the University of Colorado for two years, Mr. Warner came East and entered Cornell University, but we are glad to say that he finally favored us with his presence and received his A. B. with the "Class Who Do"—the "Lucky Class." A. B.

GERTRUDE R. BRIGHAM. . . . District of Columbia

FRANCIS EDWARD CARTER, Δ T Δ, Λ II. . . Virginia

ANNE ELIZABETH DRAPER. New York

FRANK BLAIR HANSON. District of Columbia

CARLOS CRANFORD HOUGHTON, Σ Φ E
 District of Columbia

MILTON DONALDSON MOORE. South Carolina

JOSEPH FELS RITT. New York

CLARA STOLL Austria

WE CLAIM to be a versatile class and a unique class in many ways. One way in which we are undoubtedly ahead of any other engineering class in the country is that every man in the class already has a job. We have representatives of all branches, civil, mechanical and electrical; we have short men and tall men, single men, engaged men and married men, and we have students and men who go to college.

As a class we started out bravely by defeating the Sophomores in football in our freshman year, and we have kept up the pace ever since. Members of our class have been prominent in all forms of student activity. We have winners of the Varsity letter, managers of the athletic teams, managers of *The Hatchet* and CHERRY TREE, editors of THE CHERRY TREE, the Senior Grand Marshall, the presidents of the Athletic Association and of the Engineering Society and other holders of student honors too numerous to mention. That we also number students among our ranks is shown by the fact that two of our members are holders of University Scholarships.

Officers were elected at a meeting held in November, 1912, and the presidential honors went to H. H. Snelling.

While we have not had a great many get-togethers during the year, we meet with fair regularity, a part in the drafting room on the top floor and the other bunch in the labs. in the basement. Some of our members are eligible for the society of oldest inhabitants of the University and have carried their instruments and T-squares from Van Ness Park via Fifteenth and H and 1528 I streets. We feel that the University cannot possibly get along without our guidance and most of us will be back next year for P. G. work.

Senior Engineering

ARTHUR H. BRAME, $\Sigma \Phi E$. . District of Columbia

Track Team 1908-'09

Brame believes in taking his time about things, except when he gets on a running suit. He has been gradually acquiring his sheepskin, but it's a different tale when he gets into the Inter-Fraternity race at the Indoor Meet. He ran on the 'Varsity relay back in the dark ages, but now confines himself to an annual farewell appearance.

OMAR BAILEY BUCHANAN. . . District of Columbia

University Scholarship
Class Sergeant-at-Arms 1912-'13

O. B. B.'s pet diversion is to wade through several pages of calculus and prove that there is a typographical error in the derivation. When every one else in the class is peacefully dreaming of home and dinner, Omar is still on the job to see that Prof. Dunston doesn't get a sign wrong at the end of three blackboards full of integration and differentiation.

EDWIN DAY BURCHARD. . . . District of Columbia

Burchard has the science of looking like he knows all about it down to a fine point. The professors have gotten into the habit of saying, "I believe that's correct, Mr. Burchard?" We hope he pulls the same stunt in "Dutch" and grabs his sheepskin with the bunch.

DONALD LANGLEY DUTTON, $\Theta \Delta X$
District of Columbia

The Pyramid; Dodo; Knocks Editor "The 1913 Cherry Tree"; Vice-President Athletic Association 1912-'13; Class Treasurer 1912-'13; Associate Editor "The Hatchet" 1912-13; Business Manager "The Hatchet" 1911-12; Business Manager "The 1911 Cherry Tree"; Class President 1910-'11.

The "Guke" is the senior member of the famous engineering firm of Dutton, Slarrow & Hodgkins, and, in combination with the other two, claims to know more about civil engineering than the man who invented it. He is also a financier. He managed "The Cherry Tree" two years ago and made money. 'S enough!

Senior Engineering

JOHN ROCHFORD DWYER. . . . District of Columbia
Vice-President Engineering Society 1912-13

Dwyer is one of the fastest draftsmen we ever heard of. It is said he drew that 78-foot plate girder in two hours, and there are others that took four months to do it. But then he is eccentric anyway, as he says his pet working hours are from 2 to 6 in the morning.

HOWARD WILKINSON HODGKINS, Θ Δ Χ
District of Columbia

The Pyramid; Dodo

Senior Marshal 1913; President Athletic Association 1912-'13; Associate Editor "The Hatchet" 1912-'13; Athletic Editor and Class Editor "The 1913 Cherry Tree"; Manager Track Team 1911-'12; Associate Editor "The 1912 Cherry Tree"; Class Secretary 1910-'11, 1911-'12; Editor-in-Chief "The 1911 Cherry Tree"; Assistant Manager Track Team 1910-'11; Captain Freshman Football Team 1909; University Scholarship.

When one finishes Howard's list of honors, not much room is left for further information. But reference to this list will show that Howard is there in more ways than one.

For

Rent

EDWIN S. HOFFMAN. Ohio

Hoffman is an electrical shark and gets his fun out of making the juice jump through a hoop and climb a tree. He hopes soon to have it trained so that it will come when he whistles and roll over dead. He has Dame Nature seriously worried and he may beat her out yet.

THEODORE TILTON KIRK. Kentucky

Class Secretary 1912-'13

Kirk is the inventor of the class. He claims to have the Wright brothers faded to a frazzle when it comes to the aeroplane, and is trying to get the Patent Office to see it that way. He is seldom seen except in the class room, and just where he does his inventing is a mystery.

Senior Engineering

WILLIAM MICHAEL LEONARD. Pennsylvania

Class Vice-President 1912-'13

Leonard slips around so quietly that several of us weren't sure who he was until we met him this fall. He spends most of his time below stairs, where he juggles with volts, amperes, ohms and such other things as though he had known them all his life.

FRANCIS EDWIN MARVIN, A B Φ New York

Marvin is eligible for membership in the Society of Oldest Inhabitants of George Washington. He tells tales of doings down at Van Ness Park when the moving spirit was young. He has been going after his diploma in leisurely fashion, but he recognized at once the superiority of our class and decided to grab a sheepskin with us.

MALCOLM GORDON SLARROW, $\Theta \Delta X$
District of Columbia.

Manager Track Team 1912-'13; Class President 1911-'12; Editor-in-Chief "The 1912 Cherry Tree"

Assistant Manager Track Team 1911-'12;
Class Treasurer 1910-'11; Pyramid; Do Do

Besides running our track meet this year and attending college, Gordon has been computing a table of ascending exponentials (whatever they are) out to twenty-eight decimal places. He states that his health won't permit him to study at night, and he never gets to a Saturday class owing to Chase's and a "reason," but he expects to grab a diploma just the same.

HENRY HOMER SNELLING. Virginia

Class President 1912-'13; President Engineering Society 1912-'13; Vice-President Association of Class Presidents 1912-'13; Associate Editor "The Hatchet" 1912-'13

As noted above, Henry H. has been running the Engineering Society and the Association of Class Presidents for the past year as well as a portion of the Patent Office, and he expects on the side to prove to Prof. Henning that he knows French like a native.

JUNIORS, ARTS AND SCIENCES

AS a matter of principle we hate to talk about ourselves, but we cannot resist this opportunity to tell our friends and others just who, what and why we are. The University celebrated a holiday when it first caught sight of our contingent of illustrious, eminent and eloquent consumers of canned knowledge in recognition of our imperial and unimpeachable qualities. We accepted this tribute, modestly, as became us, but in full appreciation of the justness of this testimonial of appreciation and esteem.

We met our first battle on the evening of our first class election. As we descended in dignity and company from the scenes of our political endeavors, we saw gathered upon the concourse outside a great multitude who waited. After the goats were separated from the sheep, we advanced upon the waiting varlets with the confidence gained by experience. With a lusty freshman war cry, our solid phalanx burst through the throng, leaving destruction in its path. The wise went on their way rejoicing in their strength, but a few went back to view the carnage that had resulted. From these scattered few a part were gleaned by the lame and the halt after a valiant struggle, and with them a meagre celebration was held. The upperclassmen, however, showed their eminence in spreading rumors thereafter, but fair-minded persons recognized the nigger in their woodpile, and accorded honor where honor was due.

The next year we demonstrated how successfully such a venture could be carried off; no more need be said regarding this exhibition of our abilities. And in the third year of our sojourn in these halls of learning we were content to take our ease and advise those of lesser eminence concerning the proper road to paths of fame.

After a lean year shall always come one of prosperity. And thus it is with us. When the unlucky year of Thirteen shall have passed from our view, there shall come a richer and fuller one of Fourteen, and the University shall glow with a new light under the brilliance of our scintillating radiance.

IT IS only this year that the George Washington University reaped the benefit of the crop composing the Class of 1914 in its endeavor to have athletics resumed at the school. In the basket-ball branch of sport the team, whose majority were members of the 1914 class, earned a name for the University with the other leading colleges in the South, and paved the way for the furtherance of other sports.

To our worthy president, James P. Nash, must be attributed the bulk of the success thus far achieved in the athletic field, for by his untiring efforts as acting manager of the basket-ball team, he gained esteem with the other colleges, who are now eager to indulge in other branches of sport with G. W. U. The writer cannot bespeak flatteringly of himself (as if he would) and of his entonic efforts in the "athletic revival," other than that he earned his "letter" in basket-ball, and yearning for next year to come around to continue in other sports which, it is hoped, will be accomplished then. Then, too, we have our athletic manager, Arnold Brand, who, by the sweat of his brow and the foaming of his mouth, boomed the athletic revival to the highest pitch. Our class has opened the gap, it now rests with the subsequent classes to complete what we have started.

The writer deeply regrets that the Class Presidents' Association put a ban on the Upper Class dance this year, and only hopes that a precedent has not been established thereby. It is such an affair as this that earns a name for G. W. U. in the public's eyes, but it would seem the student body thought otherwise and shunned the burden of undertaking a dance. It's no use crying over spilled milk, the school will linger in the students' eyes only.

The officers comprising the Class of 1914 consist of the following: James P. Nash, President; George A. Degenhardt, Vice-President; Louis M. Heron, Secretary-Treasurer; Thomas P. Murray, Class Editor, and Arnold Brand, Sergeant-at-Arms.

In conclusion, let me thank the 1914 Class for having paved the road to success in the athletic field, and hope that the good work will be continued so that the name George Washington University will be known to students of all other cities.

SOPHOMORES, ARTS AND SCIENCES

THE SOPHOMORE CLASS, Columbian College, is the "greatest little bunch" ever assembled in G. W. U.'s classic halls. This class, collectively and individually, possesses every accomplishment known, or unknown, to modern science. Do we hear any dissenting voices? Will that gentleman from the Houn' Dawg state kindly remain standing while we elucidate a few facts, in order to show him.

We really hate to talk about ourselves this way, but "facts is facts." To cram our glorious history into 500 words reminds us too much of trying to cram a thousand pages of Bancroft or Fiske into one's dome the night before an examination, so we won't attempt it. Suffice it to remark that every member of our class has shared in the honors of the University; that the Sophomore class has one or more representatives in every form of college activity, and in everything a Soph. participates in he towers head and shoulders above the rest. Just cast a furtive glance at the list of honors printed under our names on the opposite page and be convinced. Let it suffice, also, merely to mention our warm reception to the Freshmen (oh, pray let the mere mention of this suffice!); our political struggle in our class elections; our social events, and so on *ad infinitum*.

And so we reiterate, we are "some class," as they say in the classics. Take some of our talents, for instance. Now there's dancing. Can anyone deny that we—not we alone, but the whole class—are the greatest little bunch of terpsichorean trotters and twisters that ever rioted through ragtime over polished floors. Why, our series of dances this year were the stellar social events in the University.

And as for pulchritudinosity. Well, "pictures don't lie," so take a look at them.

And oratory! Ah, there's where we shine. There isn't a man in the class that wouldn't rather argue than go to a French recitation. And the subject doesn't concern us, either. We'll argue any subject "pro" and "con"—most of its "con." We'll spend half an hour any time telling you that instead of ham and eggs as the breakfast food has been described for centuries, it should be known as eggs and ham, taking the part that the egg should be exalted over the ham. Any man in the class can whack away at politics, religion, policies of government, leaders in literature, the old masters, marriage, and "wot not."

These are only a few of our many redeeming traits, not to mention effervescent humor and brilliancy in our studies—to which some Profs. may dissent, but we haven't space to try to convince them of this fact. So, if you are convinced by this brief statement of facts that we are "some class" we will desist.

SOPHOMORE

IMMORTAL shades rise up and pass
As names are called—the names of class—
Our sophomores in swaddling clothes
Of life's great aims—who've known not woes
Nor rugged paths those great men trod,
Ere they achieved the gifts of God.
They've answered all the final roll,
But each made marks on Fame's great scroll:
Chapman—Albion's olden poet grand.
Campbell—Churchman of our own dear land.
Halsted—In mathematics made a name.
Harsch—'Twas Horsha once, of kingly fame.
Herndon—The naval hero bravely died.
Ingram—Economist well known world-wide.
James—A hundred shades here heave in sight.
Jeffrey—Lord of England and of letters bright.
Kruger—From native land an exile made.
Morrison—Explorer, pioneer of trade.
Simpson—The novelist of fair renown.
Smith—The friend of Hume, deserving crown.
St. Clair—Our Army's chief in Nation's youth,
Woodward—Historian, ever seeking truth.
But Stutzman, Hafford, Callahan and Teal,
Must with Nickles carve their own fair weal,
While Marsden, Meany, O'Rourke and Varney
With minds as clear as fair Killarney,
Will force the Fates to yield their due
Of earthly fame and fortune too.
So let it be! Here's health to all,
On what we are we stand or fall.
Ancestral fame's not worth a fig,
The way to get is to dig, dig, dig.

FRESHMEN, ARTS AND SCIENCES

DURING the short sojourn of the Class of 1916 in the halls of G. W. U. it has been making actual history. Since September 26th the class has been mixed up in all school activities.

Contrary to precedent the Freshman Class was not humiliated in the annual set-to of Freshmen and Sophomores, but for the first time in the history of G. W. U. matters along this line were reversed. On the 16th of October a never-to-be-forgotten day for many Sophs, the Freshman Class defeated the Sophomore Class in the annual rush, and after securely tying them up with their own rope, marched these self-same Sophs around town to the universal satisfaction of all concerned.

Commencing as brilliantly, the class planned and carried off a most successful dance at the Raleigh Hotel, thereby sharing with the Class of 1915 the honor of being the only Freshman classes to carry off a financially successful dance. The officers themselves and the whole class managed things in a very business-like manner.

Another dance, more informal, was given by the Freshman Class in the Chapel, as a means of getting better acquainted and having a good time. It was very successful and everyone seemed to have a good time.

The Freshman Class is also participating in athletics. One of its members ran on the Varsity relay team and one is next year's captain of the basket ball team, while the relay team of the class defeated all comers in the race for the class relay championship.

Many of our members are also in the different collegiate organizations, some holding office. Probably by the time a Senior Class editor shall write a class history for us, he will have to tell of many noteworthy exploits of the Class of 1916.

ARCHITECTS

Architecture

IN 1904 Architecture was first established in George Washington University. We were given a "roost," just under the roof of the "late Main Building" at Fifteenth and H Streets, where many long hours were spent over Beaux Arts and other problems. Here we worked to gain architectural knowledge and to put George Washington University on the A. I. A. map.

One unhappy day it was reported to our worthy dean that a species of early Greek hen-fruit and scattered sections of the River Nile and Black Sea had fallen from a cloudless sky, much to the discomfiture of passersby. An investigation brought to light the coincidence that certain students were getting rid of materials used in water color and undesirable portions of lunch in a mysterious way. Shortly after this, the Architectural School removed to 813 Fifteenth Street.

The new quarters, however, were not constructed substantially enough to survive the earthquakes which were frequently occurring therein, so our drawing boards and T-squares were again removed, this time to 729 Fifteenth Street.

Here we remained until the rent man came around, when we decided that our draughting apartments were not spacious enough, so an emigrant train was formed and started westward.

After a long and tedious search we at last filed a homestead claim in a building on I Street, just back of the Arlington Hotel. Here we had for our own, undisturbed use an entire building, from cozy little club rooms in the basement to the dark mysterious apartment known as the loft. In the latter place on occasions have been stored sundry articles such as the "Architectural Indian" (borrowed from the Medical School dissectioning rooms), barber poles, signs, and even naughty Freshmen.

In this building we lived contentedly for many moons, thriving and blossoming out into a most promising branch of the University, until one fine day our existence was snipped off and we were left to die. Two years elapsed ere we were again heard of by G. W. U., but here we are, proving that we could "come back."

We take this opportunity to thank the local chapter of the A. I. A. for its help, without which Architecture would never have been reinstated in George Washington University.

COLLEGE OF POLITICAL SCIENCES

The College of Political Sciences

THIS article must be the valedictory of the College of the Political Sciences for the Board of Trustees has deemed it necessary, in order to secure the proper correlation of subjects, to combine it with Columbian College. While we realize that this step is necessary, we still regret it because of the many past associations connected with the college.

It was established as a college of the Department of Arts and Sciences in February, 1907, and from its inception it has prospered with marked success. It is the descendant of the Department of Politics and Diplomacy, now abolished, which was closely connected with the Department of Law and offered post-graduate courses in international law and diplomacy. The college is intended to give a training that will fit certain students for consular and diplomatic positions, for the public service of the United States, for broad commercial life and for the study of law. At the same time it imparts to the general student that general culture and equipment necessary for efficient citizenship, and the intelligent grasp of public questions. Such courses are peculiarly appropriate in the city of Washington, which furnishes the best, and, in many cases, the only opportunity for studying the government in actual operation.

The courses in the College of the Political Sciences fall into three general groups, political science and history, international law and diplomacy and economics and sociology. These courses include the theory and practice of American and foreign government, general history, international law, diplomacy, the duties of consuls, general economics, transportation, banking finance, insurance, special economic problems, trade relations and general sociology. In addition to these, courses in the Columbian College are open to the students of this college.

During the absence on leave during the past year of the dean, Henry Parker Willis, Ph. D., Professor Charles William August Veditz, LL. B., Ph. D., has acted in his stead. Dr. Veditz has been prominent in the economic activities of the government in regard to the settlement of disputes between the eastern and central railroads of the United States and their employees.

The College of the Political Sciences confers the undergraduate degree of Bachelor of Arts (A. B.). The university confers for post-graduate work in this college the degrees of Master of Arts (A. M.), Master of Diplomacy (M. Dip.), and Doctor of Philosophy (Ph. D.).

The Teachers College

THE Teachers College was established in 1906. It aims to promote the knowledge of educational science, to fit students for the higher positions in the public school service, to secure to teaching the rights and prerogatives of a profession, and to aid in raising the standards of educational practice and so to increase the efficiency of public education. The University Catalogue says, in speaking of this college:

"In order to combine to the best advantage a general college education with adequate professional training for teaching, the Teachers College provides a four-years' college course, the first two years of which are devoted to a foundation of general culture courses, and the last two to the professional courses and to specialization in the subjects which the student expects to teach.

"Inasmuch as a large number of teachers in service are without college degrees, and a still larger number desire to supplement their professional training by taking special courses, the courses of instruction have been arranged to meet the needs of teachers in service, as well as of undergraduate students. The required courses constituting the prescribed work in education are given both in the morning and in the late afternoon hours, and are, therefore, easily accessible both to students and to teachers from the schools."

The Teachers College had its inception in the District School Act of 1906, which provided that the applicants for positions in the public schools should have a proficiency in the history and principles of education.

The death during the past year of the able and efficient dean, Williston Samuel Hough, made necessary the choice of a new dean, and William Carl Ruediger, Professor of Educational Psychology in the George Washington University, was chosen to fill this position. Dr. Ruediger, besides his able work on the Faculty, has been active in other lines of university endeavor, being chairman of the Committee on Student Organizations.

The Teachers College confers the undergraduate degree of Bachelor of Arts (A. B.), and a teacher's diploma.

Senior Teachers

JESSIE DU BOIS FANT.....Utah

Vice President and Class Editor

Miss Fant is a member of the Columbian Women and has been a student at the University of Tennessee in history and school administration, serving upon its summer school faculty under Dr. Philander P. Claxton during the session 1910-'11.

DAISIE MORGAN HUFF, B. S..... Illinois

A native of Putnam, Illinois, graduate with second honors from the Henry High School, Henry, Ill.; student at the Northern Indiana Normal School; graduate of Valparaiso University, Valparaiso, Ind., with degree of B. S.

C. A. JOHNSON, LL. M. District of Columbia

Native Washingtonian, but a Jeffersonian Democrat by inheritance; an alumnus of the Central High and of the Washington Normal Schools; LL. B. 1897, and LL. M. 1898 of Columbian University, now George Washington University. He was admitted to the bar of the District of Columbia in 1899.

JOHN MACDONALD, A. B. Canada

Our Canadian cousin from across the border was born at Margaree, Nova Scotia; is a graduate of Harton Collegiate Academy and of the Alberta Normal School; an A. B. and Bachelor of Pedagogy of Valparaiso University, Valparaiso, Ind.

Senior Teachers

ELLA MAY MONK.....New York

Citizen of New York State, of which she is also a native; graduate of Egberts High School, Egberts, N. Y., and of the New York State Normal College, Albany, N. Y., with the degree of Bachelor of Pedagogy; a member of the Columbian Women, and since 1908 a teacher in the public schools of the District of Columbia.

KATHARINE SORRELL OUTWATER.....Virginia

Secretary-Treasurer

A Virginian by birth, but a resident of Washington, D. C., since early girlhood; graduate of the Central High School and of the Washington Normal School; student at the University of Virginia and at Harvard University in botany and histology; member of the Washington Biological Society and of the Columbian Women and a teacher of recognized ability in the public schools of the District of Columbia.

HARRIET UNDERWOOD.....District of Columbia.

A daughter of the Empire State who is an alumnus both of the Johnston High School, Fulton County, N. Y., and of the Oneonta State Normal School, in which latter institution she was one of the organizers of the Arethusa Society. She has been a member of the Columbian Women and of the Audubon Society; a student at Cornell and at Catholic University along scientific lines; a graduate of the Vineland (New Jersey) Training School.

MARY JOSEPHINE WHITE.....Ohio

Born and educated in the public schools of that city until the removal of the family to Norwich, Conn., where she successively became a graduate of the Norwich Free Academy at the time when it was under the principalship of Dr. Robert Porter Keep; a student at the Norwich (Connecticut) Art School, with a Connecticut State Teachers' Certificate, and a supervisor of drawing in the Norwich public schools.

LAW

REYNOLDS

The Department of Law

THE inception of the Law School dates from the year 1826, when it was organized with the Hon. William Cranch, Chief Justice of the Circuit Court of the United States, at its head. Owing to the too ambitious schemes of its founders, however, it early became involved in financial difficulties and was obliged to discontinue its courses until it was re-established in 1865.

Its course of instruction for the degree of Bachelor of Laws, originally requiring but two years, as was then the practice of all law schools, was gradually expanded, until, in 1898, in accordance with the recommendation of the American Bar Association, it was increased to three years. The faculty has also shown a gradual increase in numbers commensurate with the expansion of the course, and the growing number of students in attendance. Beginning with 1903, the Board of Trustees adopted the policy of placing most of the important topics of substantive law under the charge of trained professional teachers giving their whole time to the work of legal instruction. Those branches of law connected with practice will continue to be under the charge of professors who are actively engaged in the administration of the law either at the bar or on the bench.

In 1877 a year of graduate work leading to the degree of Master of Laws was added to the course of instruction offered. A special course in Patent Law was added in 1895.

In 1900 the Law Department was one of the group of law schools which organized the Association of American Law Schools, and it has remained a member of this association since that time. This association includes forty-three of the best and most progressive law schools of the country and is committed to the policy of advancement in legal education.

The Law School is the oldest in the District of Columbia, and the only local school which is a member of the American Association of Law Schools above mentioned. Charles Noble Gregory, A. M., LL. D., is dean of the Department of Law. The department confers the degrees of Bachelor of Laws (LL. B.), and Master of Laws (LL. M.).

The Faculty

CHARLES HERBERT STOCKTON, LL. D.	PRESIDENT OF THE UNIVERSITY
CHARLES NOBLE GREGORY, A. M., LL. D.	Dean and Professor of Law
MELVILLE CHURCH, LL. M.	Professor of Law of Patents
WALTER COLLINS CLEPHANE, LL. M.	Professor of Law
EDWIN CHARLES BRANDENBURG, LL. M.	Professor of Law
ARTHUR PETER, LL. B.	Professor of Law
JOHN PAUL EARNEST, A. M., LL. M.	Professor of Law
WENDELL PHILLIPS STAFFORD, A. M., LL. D.	Professor of Law
JOHN WILMER LATIMER, LL. B.	Assistant Professor of Law
EVERETT FRASER, A. B., LL. B.	Assistant Professor of Law
HENRY CRAIG JONES, A. B., LL. B.	Assistant Professor of Law
MERTON LEROY FERSON, A. M., LL. B.	Assistant Professor of Law
ALFRED BUHRMAN *	Clerk of the Moot Court
WILLIAM CABELL VAN VLECK, A. B., LL. B.	Secretary of the Department of Law and Instructor in Law

IN the fall of 1911, when the class of 1914 first made its appearance at our Law School, doubtless each professor who then made its acquaintance little thought that it was in any way unusual or in any respect greatly different from classes he had previously guided through the intricacies and perplexing problems of his special subject of the law. The members, as of previous classes, came to our School from the various sections of the United States and many countries of the world, most of them being college men, and many of them having one or more degrees from our leading universities. As the year progressed, however, the work done by the class was—as each member of the Faculty who had the opportunity of knowing will testify—of such a uniformly high grade, the strength and ingenuity with which the class attacked the difficult legal problems were so marked, as easily to place the class in the first rank of all the classes in the history of our Law School. This reputation survived, of course, the summer vacation, and the vigor with which the class in the fall of 1912 applied their renewed energies and the continued good work done throughout the present school year have been such as to augur well for the establishment of a record of attainment as a class, not only while in school, but in the business world in after years.

If the class does good work, the members of the class must individually be strong men, and glancing over the class roll, even those having the most intimate knowledge would have difficulty in picking out a single one of whom it could be said that he has not the possibility of attainment of position of highest rank in the legal or some allied profession. In fact, many of our class even now fill positions of importance in official and business life. It is thus seen to be impossible to make with any degree of fairness any selection from the class of members worthy of mention above their fellows for their special ability.

While, of course, there are many qualities and capabilities displayed by different members of our class worthy of our consideration in this connection, yet lest the reader forget that we are holding up our few failings—the greatest have their faults—and that the class really bears promise of sending representatives of our School to fill the highest positions in our land and elsewhere, we shall close with the respectful request that notice be given to the names on our roll that he may remember in after years when this prophecy has become a realization. The names are quite generally old, honored and respected in this country and abroad and the writer feels sure that the individual members of the class of 1914 will go forth from this University to work out a name and fame that will in no way reflect discredit upon our Alma Mater, and such as the class will be proud to record upon its annals.

Here's to the success of the Class of 1914.

The Department of Medicine

THE DEPARTMENT OF MEDICINE, in the chronological order of establishment, is the seventeenth medical school in the United States. The first course of lectures began in March, 1825. For many years the school was known as the National Medical College; subsequently as the Department of Medicine of the Columbian University.

When first established, and for many years thereafter, this school, like most others in this country, gave only a two years' course of five months each. In 1878 this course was lengthened by the establishment of a spring session devoted to lectures in certain special subjects. In 1879 the course was lengthened to seven months and attendance upon three annual sessions required, and in 1893 attendance on four annual courses was made obligatory upon all candidates for the degree of Doctor of Medicine. In order to increase the facilities for actual bedside teaching, the University Hospital and the University Dispensary were established in 1898 and made a part of the Department of Medicine. In 1902 the old Medical College, in which the exercises had been held since 1867, gave place to the present large and commodious structure.

The Department of Medicine now consists of the three essentials to a modern medical school, namely, the Medical School proper, with its laboratories, lecture rooms, library, museum, etc., the University Hospital, and the University Dispensary. These three are all completely correlated and administered according to the most modern and approved methods for the government of medical colleges.

The Medical Department of the University has been for several years a member of the Association of American Medical Colleges. It is one of the medical colleges designated as "Class A," by the American Medical Association, and it is accredited for all its work by the Combined (Royal) Medical Examining Boards in England.

These facts guarantee the character of the work done by the college and insures its students and graduates all the advantages which accrue from such association and recognition.

ENTER upon the stage in the first act of this marvelous drama, dramatis personae of a modern Herodatus, whose mission it is to delineate the virtues, the wisdom and omnipotent power of the greatest class that ever passed its time (not examinations) at a university. But I fear that in my modesty I shall fail to pay honor to whom honor is due. With that feeling I experience the same emotion that the Hindoo does when he bows before his idol, "I feel that thou art ugly, but I know that thou art great."

The story runs thus:—In September of 1909 the King, dissatisfied with the guests at his feast, gave orders to his trusted steward that he go forth into the by-ways and hedges and gather in the lame, the halt and the blind. The steward departed on his sacred duty, and anon the wide halls rang with the ancient song, "Hail, hail, the gang's all here; what the hail do we care," and they were decked in white robes and led to the banquet hall where the tables groaned under the flesh of the fatted blacks. And it was now that they chose a leader whose name was Stout, a thin man, who at once conveyed to them the necessity of purchasing a Gray's Anatomy—Imperial Octavo, 1,259 pages, price seven "bones"!—(directing them to his bookstore below), assuring them this would make wise the simple. At this they became afraid and there was exophthalmia with a rapid infiltration of polymorphous ideas into the cerebral cortex and they saw visions that disturbed their electronic equilibrium of the nervi ergentes. But they became nevertheless expert physiologists; why they could count the red corpuscles in the web of a frog's foot and Stout could even tell the pond where the tadpole was hatched, while Henneberger could argue convincingly on "Why doesn't the stomach digest itself."

And when the grandchildren of this Senior Class shall enter the Medical School of George Washington University, they will be reminded that they owe their gratitude to the Class of 1913, the Joshua of its time.

And so the night rolled on, with many a jag who lay in the corner with satisfied air. Each had done his best to honor the bounty of the King's tables. "Rosy-fingered Dawn, from her bed in the East, arose," and, lo, they stood disconsolate with bended head and anxious air, awaiting the word of the King as to whether they had paid honor to whom honor is due.

Pyramid; President of the Association of Class

Presidents 1911-'12-'13; Class President

1911-'12; Class Treasurer 1910-'11

Best card in the deck—too good to let pass,
Hence third and fourth year President of our
Class.

For influence, personality, conviction and
power,

Our hats off to Leonard, he's the man of the
hour.

ROY MCLEAY FORTIER, California

Class President 1910-11; Class Secretary 1912-13

Giant and Ruffin's historian he'll pass,

But he'll die by molecule rather than mass.

His powerful medicine put the stork in a
can,

An excited assistant recalled when he can.

His clinical wisdom, Gibraltered by rest,

Keeping temp'rature chart of water in the
West.

JOSHIAH BAKER HENNEBERGER, Maryland

Class Treasurer 1912-'13

At first, Prince among Princes at Casualty,

Later, "They're not in my class in reality."

His mouth is the font from which wisdom
flows;

He's the boy that knows, and he knows that
he knows.

WALTER HAROLD LOTT, 2D, Φ X, Vermont

Pop's smiling face and his curly hair,

A perfect magnet for the sex that is fair.

"The sebaceous and sweat glands of
mucosa," quoth he,

"Are active in cancer, how else could they
be."

LEWIS J. REGAN.....New York

The eyes of Lewis are bonny blue, the heart
of Lewis we hope is true;
But there's the blonde of old, the brunette
that's new.
In stature and years of the class he's the
baby;
But for experience, Oh you Lewy, well,
maybe.
He loves Medicine and Surgery, and's there
on the spot,
But, oh you Kernan's raggy rag and turkey
trot!"

ALBERT AUSTIN RILEY.....Ohio

Sergeant-at-Arms 1912-'13

At the F street peaches he loves to look,
"Ah, I would that these were my only book,
At the head of the medical world I would be,
Murphys and Metchnikoffs'd look sick beside
me;
Or, if my favorite poem were on the front
page,
I'd like it better entitled, 'Me and Beverage.'

JOSEPH DUERSON STOUT, B.A. .Dist. of Columbia

Φ X

Class President 1909-'10; Class Vice-President
1912-'13

A free-hearted lad, thinking little of credit,
"Pay when your ship comes, or swim out and
get it."
Loves not flushing cheek nor languid eye;
A Cupid's smile or an artless sigh.

MAY TURNER, B.S., M.S., K.A.G. .Dist. of Col.

Class Editor "Cherry Tree" 1912-'13

Blew in from old Chi. to cheer us all up,
Cast her smile omnipotent on every pup.
She sure is a "bubbling, crepitant rill,"
All the boys admire her, she's an all round
pal.
Never was such a queen since the world
began,
M. T. M. has a failing for rings and wears
three on one hand.

—Her Classmates.

MEDICAL JUNIORS

WHEN our class of twenty-five entered upon the medical course in the fall of 1910 it was as though we had stepped into a foreign land; our struggles with the new vocabulary during the first month are never to be forgotten. Then our view began to widen as we were able to give attention to ideas rather than words, and as we worked out the gross mechanism of the body and differentiated by aid of the microscope its marvelous minute structure.

The second year's work extended our professional vision still further, especially through the study of bacteriology, during which we saw with our own eyes the minute organisms that cause such ravages when they gain a foothold in the human body, as in diphtheria, typhoid fever, tuberculosis, bubonic plague, cholera, leprosy, and others. We watched the growth of these and other micro-organisms and acquired a deep respect for them and a sense of the tremendous power in the united activities of these minute vegetable cells. We were constrained to believe in the bacterial theory of the cause of disease, about which in our pre-school days we had heard rumors, and while half believing, half doubted.

The widening vision brought by our course during the past year, our third, has been of a different sort. We have attended clinics at five of our great hospitals, where we have been called Doctor by the clinicians, nurses, and patients, and where we have come in contact with disease. We have been impressed with the large number of people suffering from a great variety of ailments; and our growing ability to aid our fellow-beings has awakened in us a new sense of our usefulness in the world. We have helped set fractured bones, have aided in searching out the causes of discomfort and distress, and have been instructed in the methods of relieving these conditions. We have dealt with the secret things of life as never before; it is as though a screen had been withdrawn from before us that we might see things as they are. We begin to feel as though we are a part of the great profession of physicians.

In closing we desire to perpetuate in the annals of the Medical Department the following comment of one of our instructors: "I have not seen such a likely bunch of fellows in our school in many a day." It is scarcely believable that any class for years to come will have the face to seek to rise above this reputation of the Class of 1914.

SOPHOMORE MEDICAL

WE CAME back strong last fall and we have been hitting some pace ever since. If you don't believe it ask Dr. Kollig.

Nearly every man who was in our class last year returned in the fall. We also have a number of men who, being attracted by the high standing of the George Washington University and the splendid advantages offered one for obtaining a medical education in Washington, came here from other schools. It was with great pleasure that we welcomed these newcomers into our midst. Our class at present numbers twenty-one, and it is made up of all manner of men, from the sedate married to mere "babes in arms."

We held our first class meeting early in the fall at which we elected the following officers: President, F. Y. Donn; Vice President, J. C. Bradley; Secretary, P. S. Putzki; Treasurer, F. T. Chamberlain, Jr.; Class Editor, J. A. Rowilson. I might say that as yet we have had no use for a Treasurer.

Judging by the results of our mid-year exams, the same old bunch that has been together for the past two years will be right together at the finish, and we will be boosting for the George Washington University all the time.

MEDICAL FRESHMEN

THE Freshmen Medical Class of the George Washington University is, this year, the largest that has entered the institution in many years. There are forty-six men enrolled, representing fifteen States, and several are from other countries.

After the opening of the University we lost no time getting down to work under the direction of Professor Kollig in Histology and Anatomy, and Dr. Hornaday in Chemistry. The first day in the dissecting room was one that will long be remembered by all our men.

In October we held our first meeting as a class and elected the following to office: President, Mr. T. H. McNally; Vice President, Mr. J. T. Quirk; Secretary, Mr. Sidney Cousins; Treasurer, Mr. E. K. Stratton. In one of the later meetings J. A. Tilton, Jr., was elected class editor and the honor system was adopted and has been used in our examinations.

In the first part of February we had our final examination in Histology. A few days later a fire, which did great damage to the histological laboratory, occasioned some slight irregularity in our class proceedings and we gave our attention, while repairs were being made, to anatomy.

The class is now looking forward to the approaching final examinations, to demonstrate to our professors that we have mastered our subjects and are fully prepared to go on, and come back next year, sophomores.

THE UNIVERSITY HOSPITAL

1912-1913

THE GEORGE WASHINGTON UNIVERSITY HOSPITAL has a capacity for one hundred and twenty-five patients, with forty rooms for private cases. Over thirteen per cent. of the work done by the hospital is on charity cases, for which no remuneration whatever is received. The hospital last year passed through the most successful financial period of its existence. It was established by the University to give clinical facilities to the Department of Medicine. It is an integral part of that department, and its clinics are under the exclusive control of the clinical teachers in the Medical School.

Senior Nurses

HIS is a continuation of our last year's history, which left us in the nursery. Better far could we have remained there longer, but "whither hurried hence" we reached by successive stages, and through numerous trials and agonies the positions of ward superior, night supervisor, and at last the final bourne—the Operating Room—where the two most abused words are "technic" and "sterility," and where one works until brain and body become mere machines. But we are cheered by the thought of examinations successfully passed, and Graduation Day so near.

Many good times have we had together—this small class of ours. The fun we had at Casualty—suppers in the Board Room, frolics in the Emergency Room, and early morning walks, to say nothing of those trips down the river chaperoned by our indulgent superintendent. Here we have had perfectly good feasts in our rooms, theatre parties, and dances.

Through these three years we seven have stood together and ours is a mutual love understood and prized by all. As each one is cast upon the wide world we celebrate, and this is our toast:

Here's to the class of 1 and 3,
Whose ambition shall ever be
To live in a flat complete.
To stick together
Through all sorts of weather,
And always be merry and free.

Senior Nurses

MISS M. W. GLASCOCK
Superintendent of Nurses

MISS E. R. DORSETT
Assistant Superintendent of Nurses and Head Nurse
in Operating Room

ISABELLE PAULINE BARBER.....Maryland

We hardly know what to say of our editor, with her innocent face and coy ways. You would hardly think her one to make her soft, sweet lips fully appreciated, but look again and you will see a dimple in her chin. Think of the lack of professional dignity in being "caught" sitting on the operating table, and the calamity that followed. However, it is to her that we go with our confessions, for the advice of one who knows, and it is her notebook that has saved many a failure. Our love and respect for this little woman is strong in the hearts of all of us.

EVA MAY BOWEN.....Maryland

"Little Brighteyes," otherwise known as "Bookie," came to us an unsophisticated country girl. She has been in ill repute with the housekeeper since she banished hash from the bill of fare and with Dr. ——— since losing the gall stones. Her training has been more than that of a nurse. Ask Mr. ——— how she kept Lent.

Senior Nurses

MRS. IVY BRADY CASHELL.....Maryland

This graceful, serene woman, known to us as "Happy," carries under her cold exterior an undercurrent of infinite love. Her resolutions are many and she often tires of the game, but she has the class "sticktoitness."

CELESTE GUST, Q.C.....Illinois

A real pee-wee bird with sporting proclivities, a slight of hand with her needle, though rather exclusive with her "thimble"; slightly sarcastic, and the first of our class to be cast upon the cruel world.

NAOMI JONESPennsylvania

This bunch of thoroughly kittenish femininity has an insatiable appetite for flattery. The wise "Mervy" can furnish an unlimited amount of hot air, and her importance is most appreciated by herself. Jonesie's sweet, accommodating ways attract many friends.

CURTIS MAUDE OWNBEY.....South Carolina

Here is a bunch of Southern pride, thoroughly sarcastic, bearing the antagonistic spirit of the class—a nice girl—"neither smokes, drinks nor swears." Our Fuzzie's greatest accomplishment is flirting.

ISABELLE WILLIAMSON PRICE, Q. C., N. Carolina

A Southern girl with no thought of "totem poles," whose main ambition is to benefit others; but we think charity begins at home. Novelties entice and new experiences thrill her. In an effort to soar from the bed to the chiffonier, she came to earth with a broken finger. We all love our President's truthfulness and loyalty. "Long live the President."

JUNIOR NURSES

Sophomore Nurses

ALTHOUGH this is the year of the unlucky number, nothing very bad has happened to us yet. We are very busy this year, for our importance increases with our age. Some of us have not packed our trunks for a month, and we are beginning to believe that the hospital cannot possibly exist without us. Then, too, the basement is always full of Freshmen, whom it is our duty to instruct in the paths of righteousness and rectitude. Last year we were acquiring the professional air; this year it is our task to teach others. Already we are beginning to prepare for the Operating Room; passing towels for sponges and trembling at every request for fear of not knowing what is asked for.

Our motto is:

"So nurse, that when thy summons shall come to pass the innumerable instruments in the Operating Room, thou act not like an awkward country jay, faltering and blundering, but encouraged and coaxed by the unfailing interne, thou handle the instruments as one who knows the instruments used to cut Eve out of Adam's rib."

FRESHMAN NURSES

Freshman Nurses

THE Class of 1915 entered the George Washington University Hospital in mid-winter of 1912. The first weeks were strange ones, with new lessons to learn which we thought we already knew, such as dusting, sweeping and scrubbing. We were almost ready to give up in despair. But we had been taught "things worth while are things worth striving for." So we remain, hoping to realize the great truth.

Out of twenty-five girls who entered, nine gave up in despair. But no, one out of the nine did not. She, intrepid soul, ventured into the matrimonial stream.

At first we were quite wise, and could do almost anything, from diagnosing diseases to filling ice-caps. But we were not to remain long in this blissful state. As the weeks advanced into months, we came to realize our inadequate knowledge of hospital duties. And now we are the humble, obedient Juniors. This is our first year with you; treat us kindly. Some day we may be Seniors.

The Department of Dentistry

THE DENTAL SCHOOL was established in November, 1887, under the title of the Columbian University Dental Department. With the change of the name of the university in 1904, the Dental School was designated as the Department of Dentistry of the George Washington University.

The course of instruction originally extended over two years of five months each. With the general growing need for more complete instruction, however, the George Washington University, in common with other schools, increased the terms to seven months. This additional time still being found inadequate to keep pace with the ever increasing demand for higher dental education, the course was gradually extended until now it extends over three years of eight months each.

The number of students registered in the Dental School is steadily growing, and this year it was but a little less than seventy. It should within three years exceed the century mark. The Dental School has graduated some of the most prominent dentists in the city.

The faculty includes many of the leading practitioners of the city. The student has at his disposal, besides the well selected library of the university, the unrivaled resources of the Library of Congress and of the Library of the Surgeon-General of the Army. The latter library is the finest medical library in the world.

The dean, John Roland Walton, D. D. S., is a leading dentist of the city.

The Department of Dentistry confers the degree of Doctor of Dental Surgery (D. D. S.) for the completion of the prescribed course.

THE Class of 1913 started on the three-lap course with twenty-four breasting the tape ready for the starter's "Go." During the first heat nine failed to finish, some of whom were left at the post, the balance of the field finishing pretty well in a bunch. The second heat, three did not enter, and one new nag came in. But one was left in the "also-ran" class in this heat and one decided to make the race in four heats instead of three, because of heavy-going outside of school—a very wise course, as is evidenced by his higher grades. Still, while he will not graduate with the bunch, the Class of 1913 claim him among themselves. On the day the flag dropped for the last heat no false starts were made, but the twelve old nags and one new one, Mme. Brodsky, making the lucky thirteen, were off in a bunch.

It has been a clean race with but little fouling or crowding. The pace has been fast and the going heavy, but there has been no faltering. No whip or spur has been used and the most perfect good humor, good fellowship and mutual esteem has existed between the riders and ridden. The thirteen members of the Class of 1913 have been proud of themselves, of their thirteen instructors and of their school.

The class has not entered into any social functions, has given no banquets, has had no internal dissensions, but has done a lot of hard work in the performance of which the class has stood shoulder to shoulder, the speedier ones giving a willing, helping hand to the slower, and as a consequence there is the heartiest good-will existing each for the other. We pride ourselves that we can look back over our three years' course of instruction as a class and as individuals and see no spot or blemish. We can see nothing of which we are ashamed. We have fought the good fight and are confident of winning. There has been no disposition to see how little but rather how much each could do. When the days have been dark and the feeling that we could not stand the strain longer, a few words or chance remarks of an instructor made us feel that we still had plenty of ginger and reserve strength to go on.

The class is deeply appreciative of every effort, and they have been many, our instructors have put forth in our behalf. We have felt that we were in their confidence, that they appreciated our work, and they have shown us many kindnesses not down in the course. They had something we wanted, knowledge and experience, and of this they have given willingly, freely.

We will not attempt here to express our appreciation of nor our thanks for the patience, forbearance and earnest cooperation of our instructors, but hope they will remember the Class of 1913 with as much kindness as the class will them.

"You shall see them on a beautiful quarto-page, where a neat rivulet of text shall meander through a meadow of margin."

—Sheridan.

Senior Dental

EDWARD CRAWFORD ALLEY, Ψ Ω Kentucky

"Ed" is the man of pot hooks and "the" pompadour—few others have enough hair left. It is doubtful whether his pompadour ever got him anything, unless it is his wife; but his pot hocks has paid his way through school. He was bred in "Ole Kaintuck," but, strange to say, he is not a "Colonel," nor does he like "Burbon."

"Fashioned so slenderly."

SAMUEL CHARLES ASCHAN New York

"Sam" is a ladies' man—first, last, and always. All his thoughts, dreams, and even patients have been ladies. Did I say all? Well, not quite all, for it is believed that should any one ask him to tell the difference between a bite plate and an articulating plate and wherein a base plate differed from both, he can probably tell.

"A lion among ladies is a most dreadful thing."

ELMER E. BRIGGS, Ψ Ω Pennsylvania

"Briggy" is so quiet and reserved that he is sometimes overlooked, and it took all the way to the last half of the last year for the class to get acquainted with him. He will settle in Pennsylvania, and when he gets started old settlers will recall the Wyoming Massacre.

"Ah, why should life all labour be?"

MARIE GINSBERG BRODSKY Russia

Mme. Brodsky, a dentist in her native land, is preparing to practice the same profession in this, the land of her adoption. She is an enthusiastic worker, and proves the old saying that a woman will always have the last word in any language. Words—Russian, French, German, English—flow forth in an uninterrupted stream in what might be termed a word puzzle.

"What will not woman, gentle woman dare?"

CLAUD DUFEE, Ψ Ω Illinois

Class President 1910-'11-'12-'13

"Irish" comes from the Pope County, the original home of the MCississippi Cat, and will return there to practice. Pope County, by the way, is in the land of "Egypt," that land spoken of as flowing with milk and honey, but "Irish" looks like he had been fed on a little more substantial food—bosom of the "hazel splitters" and hominy, for instance.

"Give literal pompt to teeth of time."

Senior Dental

NATHAN EISENSTEIN, Ψ Ω Roumania

"Nat" is such a kidder, but we love the boy in spite of himself. He expects to practice in Boston town, where he can go out and see the "Cradle of Liberty," and we hope he will want one of his own. Besides studying and working hard to prepare himself for the practice of dentistry he is learning to eat baked beans, brown bread and pie, so that he will feel at home.

"Oh, why should the spirit of mortal be proud?"

ORVILL NORTON FANSLER, Ψ Ω Nebraska

Fansler grew up with the Jack Rabbits and Sage Hens, circumnavigated the globe, assisting Uncle Sam in putting down the insurrection in the Philippines en route, and then settled down to help "Tamey Jim" show how to make two blades of grass grow where "nary one grewed before." He is entitled to appear in good company.

"And we are all good fellows together."

JOHN S. HARDESTER, Ψ Ω Dist. of Columbia
Class Secretary-Treasurer 1912-'13

John is one of those fellows that has raised himself by his own boot-straps, so to speak. Realizing with Pope that the proper study of mankind is man, John took unto himself a helpmeet in his freshman year, and now he has a son, Jack, and, from his own unimpeached testimony, this boy is furnishing him with all of the raw material he needs for the further prosecution of the study of man.

"For what constitutes a child?"

CARL BURDETTE MAPHIS, Ψ Ω Virginia

Carl is the only true F. F. V. by birth and breeding in the class and is the baby of the bunch. He has had heredity, atmosphere, familiarity, propinquity, precept, and his own efforts to boost him up the stiff, tortuous climb that leads to the D. D. S.

"I never knew so young a body with so old a head."

JOHN PRESTON MARSTELLA Illinois

Class Editor and Historian 1912-'13

"Dad," or "Marsy," is the man with the least hair and the noisiest tongue (so 'tis said) of any man in the class. In spite of his bald head and venerable appearance, every one in the class insists upon "calling him out of his name"—a most deplorable lack of respect, and which he resents not at all. He is a most persistent cuss.

"I propose to fight it out on this line if it takes all summer."

Senior Dental

CHARLES WALTER RICH, $\Psi \Omega$ Pennsylvania
Vice President 1912-'13

Charley, or "Curley," is the richest man in the class. One of his best friends, worsted in a battle of words, having used all of the dictionary words, called him "Bull Moose Charlie," and just for that should have been ostracized, but Charlie interceded, and if he is willing to forgive him, in the goodness of his heart, why should the rest, who were less insulted, not do the same? He has a "keester" for his bait.

WALTER BRITTIN SILLIMAN Pennsylvania
Vice President 1911

"Doc" is the dean of the class and delights in helping the other boys out. He has had a good deal of experience and during the last semester has been assistant in infirmary practice, and as such has been of invaluable service to the boys, none of whom will soon forget him. Here's to you, "Doc." May your shadow never grow less.

HENRY MERLE SPILLAN, $\Psi \Omega$ New York

"Harry" is our "Adonis," and, with his amber eyes, dark auburn hair, gentle manners and fine physique, can not fail to succeed. "Harry's" greatest fault is his shyness. We will always expect to receive invitations to attend the New York State will be Dr. Spillan—and no one then will Dental Association clinics, and the top liner pronounce his name Spill-an.

EDWARD WILLIAMS, $\Psi \Omega$ New York

Ed, or "Henery," is our English cousin from over the sea, but he came over early, and, by training, at least, he is a blasted, bloomin' Hamerican, doncher know. Like Hardester, Ed has studied many things; like Marstella, he is bald, and like Rich he is a worker. His wife calls him "Ted," his friends call him "Ed," but the boys call him "Henery," dog gone 'em. Who said he played pinochle?

JUNIOR DENTAL

WE, the Junior Class, entered the dusty halls of the George Washington University in 1911, just at the season of the year when even the trees are nutty, and really some of us have gone nutty since endeavoring to keep our heads above the breakers. Some of our number, like many good and brave soldiers on the battlefield, have fallen by the wayside; but those of us who have been fortunate enough to stem the tide are still here plugging along endeavoring to fill the many cavities of the unfortunates that apply, as well as our mentalities, and truly hoping that we may have sufficient pull with the Faculty to extract a "seventy-five" at least, not saying a thing about the molars and bicuspsids.

The Junior year started off this year twenty strong, and I do believe that we can still boast of this number in the ring and out of jail. To be frank I think it would be interesting if it was possible to search the police blotters in the home cities from whence our class hails; but unfortunately the blotters are closely guarded and nothing short of a suffragette badge would pave the way to these treasures. The opening of the term was heralded with the usual hearty handshakes and good-wishes, and in fact everything started off nice and serene with all things quiet along the banks of the Potomac, except the noise of the Freshies in the adjoining laboratory, which was a mixture of the many sounds of tin-horns, animals and birds, and frequently sounded like a bunch of jackasses, bull-mooses, hyenas, panthers and wolves all intermingled, but they have cooled down since the midyear exams have passed, and believe me they will be as cool as a cucumber after the final is dished out to them in what is termed broken doses.

Ours may not be the finest class that has ever come down this educational pike, but we are morally sure that it is the only class of its particular kind; it is a class in, with, and by itself, so to speak, that is to say the Seniors won't let us mix with them for fear some of us might outshine them in polishing a plate or something of the kind, and we are so far above the Sophs and Freshies there is no comparison.

There has been some little friendly speculation as to who will be the honor man of the class this year, but there is no bitter rivalry over the matter, and personally it does not worry me a little bit. The truth is I believe that there is closer fraternal spirit existing in our class today than ever before, and I believe there is no reason for a change. I comfort myself with the old Texas Latin quotation: "*Poleus longissimus knockus persimones largissimus.*"

FRESHMAN DENTAL

SEPTEMBER 25, 1912, on the good ship "George W.," two young ladies and twenty young men set sail, driven by the winds of ambition, on a tempestuous three-year cruise; with a determination to make the most of the trip and stick by the ship, they hope to reach port in schedule time with many pleasant recollections of the voyage.

The desire to organize soon manifested itself, and the first class meeting was held on October 5, 1912. After some discussion and an informal introduction, the following officers were elected: President, Josiah L. Carr, of Texas; Vice President, Miss Golda Minkin, of the District of Columbia; Secretary, Arthur R. Hall, of Connecticut; Treasurer, James G. Thompson, of the District of Columbia; Class Editor for the CHERRY TREE, Griffin G. Frazier, of the District of Columbia, and Class Editor for the HATCHET, Carl W. Walzl, of Pennsylvania.

Our class was invited to attend a smoker by the Psi Omega Dental Fraternity on November 2, 1912. Several speeches were made by members of the faculty as well as by members of that worthy fraternity, after which we all enjoyed some music, both vocal and instrumental. Oh, you feed!

On December 7, 1912, the class had a smoker which, through the efforts of Messrs. Slack and Hall, proved a great success. Piano and violin numbers were rendered by members of the class.

It takes time to make history, and as our time here has been short, look for us all next year on the page just ahead of this one. Good night.

THE DENTAL FRESHMAN'S DREAM.

A red blood corpuscle is a circular, bi-concave, non-nucleated mass of protoplasm endowed with the molecules of life, and forming a part of the external occipital protuberance. It is attached by a fine, tendonous fiber to the occulsal surface of the posterior tubercle of the axis.

The National College of Pharmacy

THE NATIONAL COLLEGE OF PHARMACY, which is the outgrowth of the Columbian Pharmaceutical Association, organized in 1871, was chartered under the provisions of an act of Congress in 1872, and opened its classes on November 11th of that year. In February, 1906, it became an associated college of the George Washington University, under the charter of the university granted by Congress, March 3, 1905, providing for the organization of colleges. The associated colleges are institutions in the District of Columbia organized as corporations under the charter of the university, having separate financial foundations, but educationally forming a part of the system of the university. The president of the university is ex-officio president of the National College of Pharmacy, and member of the Board of Trustees, and the college is represented in the president's council by its dean.

The work of the college embraces courses in chemistry, botany, materia medica and toxicology, pharmacy and pharmaceutical laboratory work, analytical chemistry, microscopy, pharmaceutical jurisprudence.

The dean, Henry E. Kalusowski, M. D., Phar. D., is a leading analytical and consulting chemist of the city.

Three years are required for the completion of the prescribed course and the degree of Doctor of Pharmacy (Phar. D.) is conferred.

The Board of Trustees

The President of the University, *ex-officio*.

SAMUEL WAGGAMAN, M. D., Phar. D. Professor of Materia Medica, Botany,
and Toxicology
GEORGE A. MENGE, Ph. D. Professor of Chemistry and Physics
HOWARD M. BRADBURY, Phar. D. Professor of Analytical Chemistry
BURTON J. HOWARD, B. S. Professor of Microscopy
HENRY B. FLOYD, Phar. D. Professor of Mercantile Pharmacy
ALEXANDER MUNCASTER, Phar. D., LL. B., LL. M. . . . Professor of Pharmaceutical
Jurisprudence
DOUGLAS TSCHIFFELY, Phar. D. Assistant to the Professor of Pharmacy
LORING W. BEESON, Phar. D. . . . Assistant to the Professor of Analytical Chemistry
HOMER K. BUTLER, Phar. D. . . . Assistant to the Professor of Analytical Chemistry

AT the present writing but a few weeks remain before the closing of college, for good as far as our class is concerned. A period covering three years has been spent at the University College of Pharmacy, filled with many pleasant reminiscences, but mostly made up of hard study, and everybody is glad the steady grind is over.

The first year was marked by a very enjoyable banquet held at Freund's, during the Christmas holidays. The banquet given by the class, with the faculty as guests, was successful in every way. Some interesting discussions on both the ethical and commercial sides of the profession brought zest into the evening and also opened the eyes of us embryo pharmacists.

The closing of the term brought about a precedent at the University College of Pharmacy in the organization of that well-known "Curbstone Indignation Meet," which gave rise to the well-attended "Banking Parties," which made the summer of 1911 famous. It might be mentioned here that Whit organized the Banking Party, but is thankful to say he was never obliged to attend.

Junior year brought together a class of young pharmacists full of expectation and boastfulness over success of the previous year, but this had its bad feature in the fact it crowded out all energy for study purposes, and at the close of the session found the fellows cramming on the last few days of preparation for the final exams. During the year the class had pins made with a big "13" on them. Everyone, of course, expected to go through the ordeal in the specified time—and everyone did.

The third and final year at college will be one long to be remembered by everyone in the class. One good feature of the class was the manner in which it held together on all subjects. The Christmas exams. showed that all were going at a smooth gait, and toward the end of the year a banquet was planned which was to initiate something new in this line. A banquet where all three classes could participate was given at the Raleigh and was the most successful affair of its kind ever given by the college. The faculty were made the guests of the students. Representing the Senior class on the committee were Mr. W. H. Whittlesey, Jr., chairman; Mr. D. L. Maxwell, treasurer, and Mr. C. W. Barker. Mr. W. A. Stevens and Mr. H. Kenner represented the Junior and Freshman classes respectively.

Senior Pharmacy

CHARLES W. BARKER.....California

Treasurer 1909-'11. Vice President 1912-'13

Barker, who expects to open up in the drug business in California, is sure to use some of Prof. Menge's processes for the manufacture of acetphenetidine and acetanilide. "Bark" also has his own microscope for the detection of adulterants in crude drugs.

RALPH V. CHAMBLIN.....Virginia

Ralph is our star microscopy student. Any evening you can see the Herndon representative terribly interested in the examination of a "transverse section of an air cell." It is reported that Ralph is the Guy that put the sieve in the sieve tube.

F. E. DUDLEY, JR.....District of Columbia

Mr. Dudley's our representative from Takoma, and has all the makings of a good pharmacist. Everyone expects to see Dud. establish a chain of stores in his home town (that is when the population grows to one thousand).

DAVID LANDER MAXWELL.....Tennessee

Class President 1910-'11; Class Vice President 1911-'12

Max has converted the whole population of Foggy Bottom to the use of A. D. S. remedies, and with the same "oratorical rep," one night, showed Prof. Menge a new definition for one of the professor's complex compounds. The latter achievement brought Max fame, which will be long remembered by the N. C. P.

ANNA ELIZABETH MIX.....Maryland

Miss Mix has specialized in botany, under the tuition of Prof. Waggerman, and most any time you can see "Miss Anna" out collecting wild flowers, to which she attaches the botanical names and natural order and never makes a mistake. See Miss Mix for special quiz in botany.

P. S.—Miss Mix has lately become a suffragette.

Senior Pharmacy

IRVING ALEXANDER TENNYSON Virginia

As his name would imply, he hails from the city of Alexandria, that "small corporation" on the bank of the Potomac, just below Washington. Rex will some day leave the drug business and become head of the above-mentioned corporation, if his popularity in Alexandria continues as it is now.

JOHN WILLIAM UMHAU District of Columbia

To look at John, no one would expect him to be a studious young man. Well, he isn't. Umhau is the "take life easy man," as he contends that you only have one life to live and "he should worry." Pop Smyser and Umhau are the representatives from the S. E.

LAWRENCE B. WHITLEY North Carolina

Mr. Whitley, who has not much to say except when the suffragette sex is mentioned, is sure to have a lady pharmacist in his store in N. C. Probably Miss Mix? You can sometimes never tell.

WILLIAM HENRY WHITTLESEY, JR. Ohio

Class President and Editor 1912-'13; Class Secretary and Treasurer 1911-'12

Our President, so young and fair,
Is calm and easy going as a hare;
Of the D. C. Board he has no fear
But passed it up without a tear.

FRESHMAN PHARMACY

YES, it was a rainy evening in September. The day and the hour had come to bid farewell to High School. We were at last starting up the gradual incline which at present we are in part hoping will terminate at the coveted goal of a registered pharmacist, while probably a small per cent. of us will, when the time comes to roll up our sheepskin, be botanists or chemists, as the case may be. Just what degree of these professions we end in will be decided by the way in which we apply ourselves to work and study at the present time.

Despite the stormy weather and the clouds outside, three young ladies and twenty-five young men, with bright faces and determined minds, filed into the assembly halls of that historic structure on I Street, the National College of Pharmacy.

Upon registering we were conducted into the lecture hall. After a preliminary introduction to college life and things touched upon that would be required of us in the future, the lecture began. How we listened with every nerve strung to a high tension, as the professors of chemistry proceeded to unveil the basic phenomena of that study, which play a very large part in the pharmacist's life, is not to be detailed here.

The chemical laboratory formed great food for "Freshies" who previously had had some training in the nomenclature of symbolic formulae to display their knowledge. Anyway a "big head" is far better than a shriveled brain.

It was a month after the start of the session before the class organized and elected officers. Even then progress was slow, partly due to the fact that this was the first occasion the officers had had for experience along parliamentary lines. The worthy gentleman from Tennessee we chose for president became dissatisfied with class work, the District of Columbia (also Georgetown), including numerous other things, and vanished from the university, taking his departure to regions as yet unknown.

Consequently, we drifted on without a rudder till the latter part of February. At this stage of the game it was thought by all that it was time for this dormant class to arouse and elect a new president. It was done without delay and in good order. We believe the choice was an excellent one. Our new leader has been executing the presidential duties with the utmost sagacity.

Did you ever notice on a rainy day, probably standing in the street waiting for a street car, a dignified personage, quietly puffing a cigar, apparently enjoying life? As the rain trickled from his umbrella a less fortunate individual stands directly behind him in the crowded street. Not having the much needed umbrella, he only received the drippings from the umbrella in front.

That is just the Freshman Class. We only received the drippings of someone's umbrella who is just before us. However, we shall some day hold the umbrella ourselves.

Department of Veterinary Medicine

THE principal feature of the session of 1912-13 was the inauguration of a four-year course. There are no night schools and only one day school at present giving a four-year course in Veterinary Medicine. A comparatively small but select Freshman Class had the honor of initiating this radical step, and there is every reason to believe that it will meet with unqualified success.

A well-equipped veterinary hospital, together with up-to-date laboratories and a very capable teaching staff of twenty-seven, afford the students facilities for perfecting themselves in this line of medicine that may be equalled elsewhere but are not excelled.

This Department, the youngest in the University, has at present a very wide field of usefulness. It remains for its graduates, both past and future, to extend its sphere of endeavor, because in spite of its rapid advancement during the past few years, much remains to be accomplished.

As instances of the high standing of the Veterinary School, its graduates are eligible to compete in examinations for entrance to the United States Army and the Department of Agriculture. Membership in the American Veterinary Medical Association is also open to them. The further fact that it is one of the few Veterinary Schools registered by the New York State Board of Education, speaks eloquently of its excellence and worth.

JAMES WALTER NORRIS, D. V. M.	Instructor in Horseshoeing, Lameness and Dentistry
JESSE KARL SMITH, D. V. M.	Instructor in Veterinary Anatomy

THE Class of 1913 had the honor of being the third class to matriculate at the College of Veterinary Medicine. In other words, we were the first class in the history of the school to have a Senior and Junior class to "lord it" over us.

However, although small in numbers compared with the preceding classes we at once proceeded to show them that "we were there with the goods" and come to stay. They then left us severely alone.

After getting our bearings we settled down to elect class officers. Strange to say none of those selected for those honors are with us today. Chadwick, Martin and Littleford dropped out during that strenuous first year; others who left us to our fate at the end of the first year were Arche and Doyle, the former returning to his home in Porto Rico and the latter departing for the Pacific Coast to continue his studies at the San Francisco Veterinary College. We saw these boys depart with great regret as our association with them had bound us together in the bonds of friendship and good-fellowship.

Going down the home stretch, as we are at the present time, we are glad to be able to say that our hardships (and it is a hardship to attend class at night after a hard day's work such as many of us do) have been allayed with many pleasurable incidents that none of us are apt to forget. Our annual Association banquets, of which the third and last was the best by far, were for us delightful moments when we sat around tables laden with tempting dishes and listened in rapture to those who had made themselves prominent in our chosen profession, telling of the great work that lay before us and urging us to put forth our best efforts to qualify for that work. Then it was that we had a realization of the reward that comes to those who are willing to sacrifice the leisure and pleasures of a life of ease for the drudgery of a night course.

We are looking forward to final examination and after that commencement. Each is hoping that June 11th will find the others there to receive the highest honors of this branch of the University. Of the loyalty of the members of the class to their Alma Mater and to each other, there can be no doubt, and we are confident the *au revoir* spoken on Commencement Day will be merely an incident in the friendship started in 1910, which we are sure will last forever and a day.

Godspeed the Class of 1913.

Senior Veterinary

JACOB E. BEHNEY

Treasurer Vet. Med. Assn. 1910-'11

"Jake's" nativity is easily diagnosed from his talk. His position of interne during the past few years has made him an expert practitioner. He finds "Arecoline" of great assistance in treating equine colic, and has won the respect if not the love of his canine patients by his liberal dispensing of club sandwiches.

NORMAN CHANDLER CRAIG, Ω T Σ

Craig was born September 6, 1888, at Chester, Pa. After spending two years at Penn. he heard we had a real veterinary school here and made haste to join us. He is without a peer in anaesthetizing horses, and has some new wrinkles on canine restraint. On account of his size he says he will specialize in humming bird practice.

GEORGE H. GILLETTE

Secretary Vet. Med. Assn. 1912-'13

Class Secretary 1910-'11-'12-'13

Gillette was born in Iowa, but migrated to Kansas at an early age. Although he expects to be a practitioner, he seems to take great interest in "horses" and is very fond of attending clinics at Laurel and Pimlico. Black cats are the bane of his life. Modest and unassuming, Gillette is easily one of the most popular men in the class, as well as one of the most capable.

ERNEST GEORGE HARGETT

Class Vice-President 1911-'12

Some twenty odd years back, Hargett was born in North Carolina. He joined the ranks of the Benedicts while a Freshman, but did not allow a little thing like that to interfere with his studies. He is of a quiet disposition, which is particularly noticeable during quiz periods. Lately he has made quite a record collecting parasites at Benning and diagnosing warts.

WILLIAM ANSON HOOKER, Φ Σ K

B. S. Mass. Agricultural College; President Vet. Med.

Assn. 1912-'13; Vice-President Vet. Med.

Assn. 1911-'12

Hooker is a native of Massachusetts. After collecting and classifying all the insects in the U. S., he spends most of his time now writing all the mean things he knows about them. The "honors" he has won bear testimony to his popularity and worth.

Senior Veterinary

✱

FRED W. LAMBERT

Class Treasurer 1912-'13

Lambert was born at New Windsor, Md., March 29, 1889. While a freshman he devoted much time to inorganic chemistry and wrote several (note) books on the subject. Lately Fred has confined his activities to riding horseback in the Virginia hills and tuberculin testing.

EDWARD J. McLAUGHLIN, Σ A E

Class Editor; Director Vet. Med. Assn. 1911-'12

"Mac," as he is better known to us, was born in Chicago, Ill. He finds time to supply the class with all its wit and humor, and the ever-present twinkle in his eye is ample evidence of "another good one." No; he is not married, not yet; but awaits only the day of graduation before we expect to see him join the ranks.

JULIUS EDWARD MORCOCK

Julius first saw the light of day under the sunny skies of Georgia and has been happy ever since. He is one of the class Benedicts and has lately been noticed taking great interest in perambulators as a means of locomotion. He delights in heated discussions of matters financial and derives great pleasure from disbursing the Association funds with the one hand and conserving those of the class with the other.

JAMES BUCHANAN NICOL

Class Vice-President 1911-'12; Class Sergeant-at-Arms 1912-'13

"Nick" was born at Lexington, Va., January 19, 1890. He enjoys the distinction of being the tallest man in class, standing 73 inches. A "natural predisposition" probably accounts for his periodic attacks of somnolence during lectures.

CLARENCE REUBEN POTTEIGER, Σ A E, Θ N E

B. S. Penn. State College; Class President 1912-'13; Class Treasurer 1911-'12; Member Athletic Advisory Board 1911-'12

"Potty" is a native of Pennsylvania, but, after "posting" the last election returns, he is trying to keep the fact shady. "Potter" suffers with hypertrophy of the heart, and as a result loves all the girls. He is very liberal, especially in dispensing strychnia.

Juniors

LO, verily, it was in the fourth year of the reign of the mighty Tapht there journeyed again from the golden-topped fields of Korn, amid the murmur of the lofty trees, a multitude of youths seeking out the Temple of Knowledge. A most motly herd were they, begging guidance along the thorny road to wisdom, content for another nine lean months to sit at the knees of the high priests and sop up the Sacred Bhull propounded to them; yea, verily to learn the magic art to make cures on the sweenied and the spavined and to wax fat on the pittance of the common multitude.

Lo, far into the night did these youths for many moons plug and bone and seek understanding till verily their eyes did bulge like unto a goggly frog; yea, e'en as a boogy man's eyes do bulge, and till the crow of the cock, heralding the new dawn, did they delve into the teachings; yet, well.

And they all received much blessing from the High Priest, Oha Ra, who spake tremulous words of praise; and it came to pass that a great heydey arose at the shrine of the Sacred Bhull as one waxed wroth, he from among the number of the older devotees.

And he did betake him polluted warblings to the temple of the Most High Priest, crying, "See we no virtue in the brain skulls of the Jhunyur Klan, e'en the High Priest bestoweth praises upon these unworthies," and straightway the Most High Priest did pluck Kataracts of ego from the eye of the lamentor and sent him forth rejoicing that he could see the beauties and purity of the Jhunyur Klan. Yea, verily so.

And now in the moon in which these writings are scribed there comes discord among the Jhunyur Klan, for it comes to pass that the High Priest, Lhe Kompte, sacred keeper of the deadly Bhugs, gives tidings of the great calamity that will come to pass, prophesying dire things, till at length when the moon rides high and the planet of the dog is in the ascendant, comes the gathering of the Klan to make quiz for the Mighty Wind. Yea, verily, the midnight oil doth burn and there comes visions of multitudinous Bhugs and other signs of the sacred screed of the Bhull. And none find rest nor sanctuary from the Big Wind.

JUNIOR VETERINARY

Junior Veterinary

And ere these words are writ there did come the Big Wind and the bones of the Jhunyur Klan did shake like peas in the dried pod, and they waxed sore afraid and filled with dread forebodings.

And now the Wind has passed o'er, and all who felt of its inexorable breath do cringe and the High Priest of the Bhugs telleth no words of salve, and all the Klan is dumb; yea, like unto the Bhugs, the Klan does seem Bhugs.

And it comes to pass that the Klan is on the last half of its journey, diminishing not but adding to its number two misled and badly bruised brothers, Haze and Lunzdhen, and the caravan pushes forward performing wonders, covering itself with glory, and giving Alma Mater cause for much rejoicing thereat. They fear not the end, for their tents will be pitched far above the sands of the Big Winds and will there remain, yea, and take toll of all the multitude of suckherrs that pass the way of their oasis of the Sacred Bhull.

Verily, all the multitude doth bump their skulls to the Sacred Bhull, which cures the sweenied and the spavined and yea likewise doth the youth of the Jhunyur Klan bump their beans, for doth they not have understanding that the lesser beasts of the earth shall be their lawful prey and upon them shall they work their magic? Yea, e'en though the beast may die and yield up his ghost shall they practice till all wax fat and gain wives and lands and other things from the magic working of the screed of the Sacred Bhull.

Yea, these writings are and shall be as they are writ.

Yea, verily.

FRESHMAN VETERINARY

STARTING as we did on our trip through four years of study and hard work we don't seem to have made much history in so short a time, although we got together and organized our class, electing such men to office as we deemed capable in every particular for the respective positions, in the person of H. H. Brown, president, and H. J. Biondi, secretary and treasurer.

We are only a very small class, but I think we have as good material as is found in any college. We know the high standard being set for veterinarians and we are striving to that end, and not only to finish but to be able to cope with the best of our profession. Our motto—"Quality not Quantity"—I think, will stand throughout the four years to come.

We have been discouraged time and time again only to find ourselves again "pounding" over our studies, and again coming out victorious with our obstructions forgotten.

We are a very cosmopolitan class, there being six States and the District of Columbia represented among our ranks. And as to good-fellowship we have never seen any better fellowship exist in any class of young men, who seem to have been cast together from every way the wind blows, every member being willing to help the other, and every man getting in his joke without fail every time we meet.

We are not predicting any world beaters in our little class, but we do say "Look out for this class of 1916!"

We are doing what no other class in this Department ever had the opportunity of doing, taking a four years' course which previously only required three. It seems a very hard thing to do, but our dear old Alma Mater knows what is best for us and we are perfectly willing to abide by everything which is done by them without even the slightest criticism. And we know our worthy Faculty is working hard for us, and we are striving to help them because it is "team work" we want.

Well, here's to our Alma Mater and the Class of 1916.

Delta Sigma Rho

(Debating Honor Fraternity)

FRANK RUMER JEFFREY.....*President*
 HARVEY CLEVELAND BICKEL.....*Secretary-Treasurer*
 MAURICE COHEN*Historian*

THE DELTA SIGMA RHO is a national debating honor fraternity which had its inception at the University of Minnesota in 1904. It has since grown to a remarkable extent both in the number of colleges represented and in its importance in every college in which it has a chapter. Among the universities which have chapters in the Delta Sigma Rho are included the largest eastern universities, such as Harvard, Yale, Columbia, Pennsylvania, and Dartmouth. The west is represented by its most prominent universities, including Wisconsin, Chicago, Illinois, Iowa State, Michigan, and Minnesota. Among the southern universities George Washington and Virginia stand out as the most prominent.

The George Washington Chapter was chartered May 1, 1908, at the time when the University was at the height of its success in intercollegiate debating. It has since been a flourishing and prominent college institution, giving added impetus to intercollegiate debating. The prospect of membership in such a strong national fraternity and the honor of being admitted to it have been a powerful incentive in inducing men to be active in debating who might not otherwise have become interested. Among the successful George Washington Alumni who are members of the Delta Sigma Rho are Alvin Newmyer (LL.B., 1906), David A. Baer (A.B., 1910; LL.B., 1912), James W. Berry (A.B., 1909; LL.B., 1911), and E. Otto Schreiber (B.A., 1910; LL.B., 1912), all practicing attorneys in this city; E. Percy Gates (A.B., 1908; LL.B., 1910), Field Secretary, Christian Endeavor, State of Illinois; John T. Kennedy, LL.B., 1907), Instructor in Law, Washington Y. M. C. A.; Norris Bowen, Clerk of the Court of Alexandria County, Virginia; and William C. VanVleck (A.B., 1908; LL.B., 1911), Secretary, Department of Law and Instructor in Law in the University.

The continued success of the local chapter is assured by the renewed activity of the University in intercollegiate debating. All the members of this year's team who will represent the University in the Washington and Lee debate become eligible for membership in the fraternity. While participation in intercollegiate forensic contests is a prerequisite for admission intercollegiate debaters do not *ipso facto* become members of the fraternity. Their merits and their contribution to the development of debating in the University are also given consideration before they are accorded this honor.

The fraternity desires to express its sincere sorrow at the untimely death of Walter England Calley, a member of last year's intercollegiate team.

THE TRACK TEAM

JOHN S. HAMLIN, *Captain* MALCOLM GORDON SLARROW, *Manager*
 Assistant Managers
 SAMUEL MELTON BARRETT RUSSELL D. TIBBETTS
 JULIAN W. CUNNINGHAM

MALCOLM GORDON SLARROW
Manager

THE recommendation of the previous management that Mr. M. G. Slarrow be elected manager for the year was approved by the Faculty Committee last spring, and Mr. Slarrow took charge immediately in the fall.

After the athletic meeting held in the Medical building in the fall, a meeting of the "W" men was held, and Mr. Herbert S. Hamlin was elected captain of the team for the year. He has been very active throughout the year in getting men to come out and train, and for the first time in a number of years the University was represented by a Indoor Meet.

Early in the season there was considerable doubt as to the advisability of having a meet this year, owing to the fact that the meets had all previously netted financial deficits. The idea was started of securing guarantees from the various student organizations, and many contributed, so that nearly \$150 was pledged, which it was thought would be ample to cover any possible deficit. However, in spite of all efforts, the deficit was double that amount.

Considerable difficulty was had in securing Convention Hall on a good date, and it was finally necessary to hold the meet on February 22nd, nearly two weeks later than usual. Manager Slarrow worked hard, but had but little assistance. He secured the entries of Melvin Shepard and Abel Kiviat, two Olympic stars, who came down from New York to compete, and the entries from the usual number of universities and colleges, among whom were Virginia, Johns Hopkins, Lehigh, Swarthmore, St. Johns, Catholic University, and Maryland Agricultural College. In spite of the attractive entries, however, the expected crowd failed to materialize and the meet netted the usual deficit.

THE RELAY TEAM

Track

JOHN S. HAMLIN
Captain

UR track team made its first appearance of the year at the Johns Hopkins-Fifth Regiment games. There we ran against the relay four representing Maryland Agricultural College, and our team won handily in fast time. The men who ran were Valaer, Hamlin, D. C. Smith and Tibbetts.

In our own meet we ran against the Catholic University four, to whom we lost a good race. The race was to have been at a mile, but the distance was cut to 1,200 yards just before the meet, and our men were not trained for the shorter distance.

Our second team lost a fast race to the M. A. C. second team. Maxson finished third in the mile and scored the only point for the University.

The only other indoor appearance of the team was at the Richmond College Meet in Richmond. Two of the men on the team which had run in the previous meets were unable to go, and the team was composed of Maxson, Smith, Tibbetts and Yost. We lost to the fast team of our old enemies—Richmond College.

The men who have come out and trained under such adverse conditions deserve the thanks of the school, and it is particularly due to Captain Hamlin and Manager Slarrow.

THE BASKETBALL TEAM

BASKETBALL

GEORGE REGES, '15, *Captain*

ALEXANDER GORMAN, '14, *Manager*

Assistant Managers

JAMES P. NASH, '15

P. A. CHAMBERLIN, '16

ERWIN HARSCH, '15

ALEXANDER GORMAN
Manager

THE first step toward starting up basketball in the University this year was taken at the general athletic meeting held early in the fall, on October 9th. At that time Mr. McNally was elected temporary captain and Mr. Gorman temporary manager, and a general call for candidates was issued. In view of the condition of the athletic treasury the basketball team was run as a separate entity. It was permitted to be started with the understanding that the management would guarantee that the team would be self-supporting, and that the Athletic Association would be responsible for no possible deficit. From the report turned in by the management it is proven that there is one sport at least which can be self-supporting at the University.

Mr. Gorman made arrangements to secure the use of the Y. M. C. A. gymnasium for training purposes, and the first call brought out a number of candidates. He also arranged a schedule of games with the other institutions in this section.

At a meeting of the Executive Committee of the Athletic Association, Mr. Gorman was formally elected manager, and since there were but three nominees for the three assistant managerships these three men were declared elected.

The first game of the season was played against the fast team representing Catholic University, and we lost by the score of 43 to 14. It was played after but little practice and before the team had the services of a coach, so that the showing made was really very creditable.

Basketball

GEORGE REGES
Captain

Kuehn, Murray and Nash.

Mr. J. P. Nash has been elected manager for next year and Thomas Noonan captain.

The next game resulted in a win, our team defeating the Maryland Agricultural College team by the score of 21 to 14. This was after Mr. Schlosser had been secured to coach the team and the improvement was apparent. In the next game the team, however, lost to Gallaudet by 38 to 32. Mr. McNally found it necessary to withdraw at this time and Mr. Reges was elected to captain the team.

The next games played were on the short Southern trip, where we lost to Washington and Lee on February 25th by 59 to 11, and were defeated by Virginia Military Institute by the score of 25 to 12. The teams playing on their home floors made good use of their advantage.

The big game of the year was the Virginia game at the Arcade on February the 18th. The game was fast and well played. Our men got started too late as Virginia rolled up a score in the first half which was too large to overcome though they were played to a standstill in the second session. The score was 37 to 15.

On the whole the season can be said to have been a success, although the number of games won was small. It was a very creditable showing for our first year in the sport, and all indications are that next year's team will be a great improvement.

The basketball insignia, the W with the BB, was awarded to Gorman, Reges, Noonan, Gore,

GEORGE WASHINGTON UNIVERSITY has always been well represented in the field of rifle shooting, its teams having earned for themselves a well-deserved recognition as a dangerous factor in any Intercollegiate competition they might enter.

Our first venture was on the occasion of the second Intercollegiate match in 1906, when our team traveled to Sea Girt, N. J., and defeated the teams from Pennsylvania, Harvard and Massachusetts Institute of Technology, thereby relieving Princeton of all responsibility for the safe-keeping of the championship trophy—for that year at least.

No competition was held in 1907, but the following summer an entirely new team was organized and sent to Boston to defend our trophy. Again we prevailed, defeating the field decisively with a score of 725.

Sea Girt was chosen as the scene of the fourth annual competition. This event offered the opportunity for our third consecutive victory in the struggle for the trophy which will remain in competition sixteen years and then be awarded to the college with the largest number of wins registered.

Massachusetts Agricultural College, with a total of 782, carried off the premier honors at the fifth Intercollegiate shoot held in June, 1910, at Washington, D. C. George Washington was second with 760, a score of 22 points better than any that had hitherto been made. However, the captain of our team, J. Ralph Fehr, carried off the individual honors in making a total of 141 out of a possible 150 points and establishing an Intercollegiate record that has never been equalled.

Thus closed the first period of our activity. Two summers have passed without a representative of George Washington University in the race. During that time Massachusetts Agricultural College registered a second victory, but lost to Harvard in 1912.

Arrangements have been made to enter George Washington University in the eighth competition next June. The material is the best that has ever been available, and under the same leadership as in 1910 and with O. D. Knight as manager, the team bids fair to again place the seal of George Washington University upon one of the bronze leaves of the trophy.

GIRLS' BASKETBALL TEAM

THE PYRAMID

The Pyramid Honor Society

THE Pyramid Honor Society is the only organization of its kind at George Washington. Its members are drawn from the ranks of those students of all the College of the University who have reached at least their Junior year and who have been especially distinguished in some branch of student activities.

The purpose of the Society is to band into one body those undergraduates, who, by their zealous and consistent activity in University interests, have merited the honor of public recognition, in order thereby to promote the welfare of the University by all the means at its command, to aid and encourage student activities and to build up a stronger college spirit among the student body.

Such an organization as this cosmopolitan, distinctive society conducted as it is upon broad lines of general helpfulness both to the students and the institution is of no mean value to a university. It offers an incentive to earnest participation in college activities and will go far to keep up a high standard of endeavor in athletics, publications, debating and like enterprises which are such essential elements of true college life.

Following are the officers and members of the Society. Their college records may be found under the various class rolls.

Fellows
BURDETTE, PHILLIPS, TAYLOR, THOMPSON.

This order is said to be "the bearer of the mysteries of Anubis from the far East," and according to many old writers to have had its origin "on the sixth day, being the fifteenth of March, of the first year of the world."

It claims to possess at its grand lodge a number of relics including the Grand Arcanum of the Sages, the Sodic Hydrolith, the Twelve Keys of the Twelve Gates, the Divine Magisterium and the Emerald Tablet found by Alexander the Great and on which are written the Thirteen Sentences.

As near as can be learned the governmental power of this ancient and accepted order is vested exclusively in the Grand Copt who issues all communications, grants all dispensations, and decides all matters of polity.

"Ascend with the greatest sagacity from the earth to heaven, and then again descend to the earth, and unite together the powers of things superior and things inferior. Thus you will obtain the glory of the whole world, and obscurity will fly away from you." (The Eighth Sentence.)

The Inter-Fraternity Association

NORMAN RAYMOND, © Δ X.....*President*
 HENRY A. KRUGER, Σ Φ Ε.....*Vice-President and Treasurer*
 FRANK A. HOWARD, Σ X.....*Secretary*

EARLY in the fall of 1911 several of the fraternity men at George Washington got together for the purpose of forming an Inter-Fraternity Association.

The object of the Association is to promote among the fraternity men here at college a friendly feeling and to revive some of the old traditions of George Washington University. The place of such an association is indeed large and the results obtained so far have been very encouraging.

Each fraternity sends one delegate to the meetings, who soon becomes interested in the work of the Association and consequently there springs up among the delegates a feeling of friendship, thereby promoting the main object of the Inter-Fraternity Association.

The constitution provides that there shall be held one smoker and one dance each year. Accordingly steps were taken shortly after the opening of college last fall to arrange for the first Inter-Fraternity smoker. The evening of December 7th is a pleasant reminiscence to those who mingled with their fellow Greeks in good fellowship at the Continental. The old G. W. U. yells, which have been so long silent, and the college spirit, which in the past has somewhat lagged, were indeed revived.

With the smoker as an inspiration the Association started plans for a dance. The results of these plans were felt by all who attended the first Inter-Fraternity Dance at the New Willard on March 28th. The Red Room was decorated with the several Greek letter banners representing the different fraternities, and here eighty men and their ladies danced until two.

The Inter-Fraternity Association is now an important factor in the student life of the University. The start has been made, will it continue?

The Enosinian Society

HOWARD W. HODGKINS.....	<i>President</i>
NORMAN TAYLOR	<i>Vice-President</i>
DUNCAN C. SMITH.....	<i>Secretary</i>
ALVIN MCC. BROWN.....	<i>Treasurer</i>
M. A. GORE.....	<i>Sergeant-at-Arms</i>

Executive Committee

DONALD L. DUTTON	GORDON SLARROW
EARL M. JEFFREY	

ESTABLISHED in 1822, the Enosinian Society of the George Washington University has endured to the present time, surviving all the trials and vicissitudes—and there have been many of them—through which the University has passed. If we are to judge the future from the past, it may well be said in days to come, “Other societies were and are no more, but the Enosinian flourisheth even unto this day.”

The society has contributed more intercollegiate debators to the teams representing the University than all the other debating societies combined. Not alone in the field of debating has it been pre-eminently distinguished. It has also led in other branches of student activities. It has constantly stimulated and fostered literary effort and has published in addition to a host of essays on a vast variety of subjects, two literary journals, *The Bee* and *The News*.

Among the names appearing on the roster of the society are those of Lafayette, Webster, Clay, Calhoun, Bryant, J. Q. Adams, Martin Van Buren and Edward Everett. Among the members who have now attained high rank in educational and scientific circles, is that of Dean Hodgkins, of the College of Engineering.

NEAR the beginning of the school year of 1913 an upper classman conceived the happy idea of forming a club for the development of art among the students of the University. He took into his confidence two other students whom he considered worthy in every respect and the three formed plans for the origin and development of the Pipe and Palette.

It was agreed that the active membership should not, at any time, exceed six, and the requirements for entrance were placed so high that these six would probably be the only eligibles in School.

The season was started with a dinner given at the Ebbitt House, after which the famous pipes with inlaid silver palettes were first lighted. Since that time, one night in nearly every week the puffers of these pipes may be seen grouped around a table laden with food exchanging excellent stories and discoursing on art in its various forms. The possessors of the palette may also be seen most any Sunday placing on paper bits of landscape that would make Whistler or Millet rise from their graves.

The majority of the illustrations in the 1913 CHERRY TREE are the work of its members, while the Architectural Club owes its reorganization and present standing to these Pipes and Paletters.

Lucky are the men who have been elected members, here they are:

WILLIAM T. CONBOYE	R. KARL GALBRAITH
E. BURTON CORNING	HUGH N. MCAULEY
RICHARD W. CRAYTON, JR.	MARC PHILLIPS

The Sphinx Honor Society

HILDA L. ULRICKSON, *President*

EDITH CASH, *Secretary-Treasurer*

GERTRUDE BROWNE

ELEANOR I. JONES (Honorary)

GENEVIEVE FRIZZELL

LEILA F. SCOTT

FLORA HULL

OLIVIA TAYLOR

HE Sphinx Honor Society was organized in the fall of 1912 for the purpose of promoting college activities and spreading college spirit among the women of the University.

Its membership is limited to seven, but may be drawn in the proportion of one from the Sophomore, three from the Junior, and three from the Senior classes. Those women who have shown themselves most actively interested in college affairs are eligible for election at the May meeting of the society.

It is hoped that this society will do much for the women of the University. Already the society has shown that it meant business, by starting a campaign to raise money for refurnishing the women's study-room—a room used by all the University women, and which was not an especially attractive one. There are many other lines of work opened to it, and with the support of the student-body the Sphinx Honor Society cannot help but be a success.

HERBERT P. RAMSEY, '16.....*President*
 WALTER B. BROCK, '15.....*Vice-President*
 H. BURTON LOWE, '16.....*Secretary*
 ERWIN HARSCH, '15.....*Treasurer*

DURING the past year the George Washington University Students' Young Men's Christian Association, although it has met with what appeared on the surface to be failures, has been eminently successful in its work for the moral and physical welfare of the young men of the student body.

The Association of the University is greatly indebted to the Central Association for the exceedingly generous combination membership offer which they made to the men of the school. By this offer men were enabled to join the University and Central Association at the same time for the small sum of \$5, the ticket permitting eighty admissions to the gymnasium and swimming pool along with the other Y. M. C. A. privileges at the building and the school.

Early in the year discussions were had in the Y. M. C. A. business meetings as to the methods to be employed in the organization and operation of a Men's Bible Class. The officers were aware of the "peculiar difficulties" presented by the school in that the majority of the students were those who were employed during the day and were attendants of the evening classes, and also that there was not a time to be found when a fair proportion of the day students were at the school. Hearing rumblings of distant thunder from the clouds, however, they decided that the best thing which they could do would be to organize the class and to call the meetings of it at the time which would suit the greatest number. In accordance with this plan, Rev. J. Harvey Dunham, pastor of the Western Presbyterian Church, was secured as leader and the time was set for one o'clock on Fridays.

The Y. M. C. A. has subscribed to a number of magazines and they have been regularly placed on the tables in the Y. M. C. A. room. It might be added that they have systematically and consistently absented themselves from this room after a short sojourn there, although some of them have been known to remain there as long as a week.

The annual banquet was held on the 26th of March in the Assembly Room of the Y. M. C. A. Building. This event was notable for two reasons—the speech of Hon. Henry B. F. MacFarland, and the crisp, sound advice given by Dr. Hodgkins, Dean of the Department of Arts and Sciences. Considering the "peculiar conditions" on which Mr. MacFarland congratulated us, the attendance was very good.

Officers

HILDA LOUISE ULRICKSON, '13.....	<i>President</i>
MARGARET WILSON, '14.....	<i>Vice-President</i>
MIGNONNE McCABE	<i>Treasurer</i>
FLORENCE KERBY, 15.....	<i>Secretary</i>

THE Y. W. C. A. has long been a steady and uplifting influence in college life. This year, especially, it has been prominent in the movement to broaden college spirit and influence. Much of the credit for this enterprise is due to its able executive, who has often suggested and always pushed on the schemes for furthering college interests, both in the Y. W. C. A. and out.

The girls' room, which is under the supervision of the Y. W. C. A., is comfortable and roomy, although there is much to be desired in the way of cheeriness and decorativeness. At the present writing there is a movement on foot to raise money for certain furnishings, and it is to be hoped that before the year is ended the appearance of the room will be materially improved.

At Christmastime the Y. W. C. A. cooperated with the West End branch of the Associated Charities to bring the season's cheer to destitute families. The Thanksgiving contributions were sent to Friendship House, a settlement house in Southeast Washington.

There have been a number of interesting talks at the weekly chapel services, given by speakers secured by the Program Committee.

Among the social occasions, one of the first of the year was the party given to all college women by the Y. W. C. A. It took the form of a track meet, which would have put the men to shame. After that arduous exercise the girls rested, were refreshed according to the method usually in vogue at a party and listened to urgent invitations to join. It is noticeable that the membership always increases after such an affair.

Another thing worthy of mention was the joint social of the Y. W. and Y. M. C. A. on April the second at the main Y. M. C. A. building. It came up to all expectations, and was so successful that regret was expressed that there hadn't been more of them.

ENGINEERING SOCIETY

HENRY H. SNELLING.....*President*
 J. ROCHFORD DWYER.....*Vice President, C. E.*
 A. SHERMAN HALSEY.....*Vice President, M. E.*
 LOUIS C. HERON.....*Vice President, E. E.*

EXECUTIVE COMMITTEE.

HENRY H. SNELLING	J. ROCHFORD DWYER	A. SHERMAN HALSEY
LOUIS C. HERON	GEORGE A. DEGENHARDT	

THE fourth year in the history of the Engineering Society has been one of great progress and much advancement. During the year the Society has held many meetings and functions that have been well attended.

The Banquet of the Engineering Society was held on the evening of February 3, 1913. The attendance was all that could be desired. The speeches of the guests of honor were such that those in attendance found much to congratulate themselves upon being there. A pleasing feature of the banquet was the singing of the college songs.

Through the courtesy of Director S. W. Stratton, the Engineering Society were able to spend a very interesting and enjoyable evening, visiting the laboratories of the Bureau of Standards.

Many evening technical meetings were held during the year. The high character of these meetings was attested by the gentlemen giving them. Many scientific points were discussed and much benefit was derived from these meetings.

In speaking of the important change which took place last year in the constitution of the Society, whereby all nominations for officers of the Society must be made at the first meeting of the year and the elections held at the next meeting, to avoid any possible chance of rushing through with an election, it may be mentioned here that the plan worked to the best of advantage.

The bi-weekly meetings of the Society proved highly satisfactory to the members.

This Society stands for advancement in all things worth while in the engineering line, and is a strong bond uniting its members to a better acquaintance.

The Engineering Society closes a most successful year and has without doubt fulfilled its object—"to promote that spirit which will be an increasing source of strength to the Engineering College, and to the engineering members."

CHEMICAL SOCIETY

G.W.U.

NINETEEN THIRTEEN

PROFESSOR CHARLES E. MUNROE.....	<i>Honorary President</i>
DR. HARVEY W. WILEY.....	} <i>Honorary Members</i>
PROFESSOR F. W. CLARKE.....	
HENRY A. LEPPER.....	<i>President</i>
A. S. THATCHER.....	<i>Vice-President</i>
E. A. GIANTVALLEY.....	<i>Secretary</i>
J. N. TAYLOR.....	<i>Treasurer</i>

The Executive Committee consists of the officers and the following:

JOHN BROCKWELL L. T. LEONARD ELMER STEWART

HE scholastic year of 1912-13 records a most successful one for the Chemical Society. With a roll of half a hundred members it is considered the largest student scientific organization in the University and in point of enthusiasm and interest is surpassed by none.

At the first meeting of the year when a number of new members were elected, Professor Munroe, Honorary President of the Society, gave one of his inspiring talks.

A number of interesting and instructive papers were presented and discussed at the regular monthly meetings held throughout the year. Among the subjects treated were: "Beer," by Mr. Giantvalley; "Sulphuric Acid," by Mr. Ramsay; "Glass," by Mr. Stewart; "Dips," by Mr. Taylor; "Yeast," by Mr. Luckings; "Soil Bacteriology," by Mr. Leonard; "Exothermic Steel," by Mr. Lepper; "Science vs. Art," by Mr. Pozen; "Geology As An Aid In Iron Ore Explorations," by Mr. Walton, and "Electrolytic Copper," by Mr. Donk. Mr. Brockwell exhibited a spinthariscopes, and Mr. Thompson gave the results of his research on "Quicklime As An Explosive," while Mr. Lodholz had charge of abstracts from current chemical literature.

At the annual public meeting held in January the speaker of the evening was Dr. Frank K. Cameron, in charge of physical and chemical investigations, Bureau of Soils, who gave a lecture on the potash problem.

An inspection trip was made in the fall to Alexandria, where the sulphuric acid plant, bottle factory and brewery were visited. In the spring a trip was made to Baltimore and a number of manufacturing industries were examined.

The red-letter event of the year was the banquet, appropriately held on the eve of Washington's Birthday at the New Ebbitt. With Mr. Pozen as "spark plug" some remarkably fine "sparks from the anvil of experience" were effected from a number of the guests, and it was observed that there was absolutely no period of induction at this function or attending any other reaction set up during the year in the Chemical Society of G. W. U.

ARCHITECTURAL CLUB

WILLIAM T. CONBOYE.....	<i>President</i>
R. KARL GALBRAITH.....	<i>Vice-President</i>
JAMES L. KEISTER.....	<i>Secretary</i>
E. BURTON CORNING.....	<i>Treasurer</i>
L. H. FREEMIRE.....	<i>Sergeant-at-Arms</i>

EARLY Greek history tells us that the coming of a great event was announced through runners who were sent all over the country with the news. Thousands of people answered these calls. Early G. W. U. architectural history tells us that the coming of the greatest of all events was merely announced by the tacking of a poster just outside of Dean Ash's office. It had the same effect as the runners, for what we lacked in numbers we made up with enthusiasm. This great event was the formation of the George Washington University Architectural Club.

The Architectural Club has always been Bohemian. A meeting was generally begun with an instructive lecture, after which there was a grand scramble for the realm of sausage and cider. The monotony of these feasts was at times broken by spontaneous athletic stunts, such as putting the shot with a cider jug or bowling with ice and bottles. Then, too, we must confess that Freshmen were sometimes surprised to find warm doggies coated with mustard suddenly thrust down their necks, or lumps of cheese hurled at their heads, but this, of course, was merely following out the old custom.

At present the enrollment includes twenty-five members.

Many interesting and instructive lectures have been given by noted men, among whom were Mr. H. K. Bush-Brown, the sculptor, Professor Murphy of Catholic University, Professor Ash of G. W. U., and others.

At the suggestion of Professor Harris the Club is publishing an architectural annual comprising the best work of its members. The committee, composed of Messrs. Porter, Keister, Conboye and Freemire, announces the fact that a sufficient number of advertisements have been secured to ensure a profit of at least \$100. With this amount we hope to start the library much needed by our architectural students. These catalogues, which will contain full particulars of the architectural course, besides twenty or thirty half-tones of our work, will be sent free of cost to every practising architect in the States of Maryland, Virginia, West Virginia, North Carolina and Georgia, and the District of Columbia, as well as to every preparatory school likely to contribute students to G. W. U.

As there will be one thousand copies of the annual put in circulation this year, the University should be greatly benefitted thereby. Great credit is due Professor Harris for his suggestion and indispensable help.

The Athletic Association

HOWARD W. HODGKINS, Eng. '13.....	<i>President</i>
DONALD L. DUTTON, Eng. '13.....	<i>Vice President</i>
DUNCAN C. SMITH, C. C. '13.....	<i>Secretary</i>
WILLIAM F. PASSER, Med. '14.....	<i>Treasurer</i>

EXECUTIVE COMMITTEE.

The officers *ex officio* and

SAMUEL M. BARRETT, C. C. '16

HAROLD KEATS, Law '15

THE question of forming an Athletic Association was agitated last spring, and early in the fall a mass-meeting was held in the Medical Building to bring the matter to a head. At that meeting a temporary committee was elected, to have charge of the organization of the Association. This committee sold a number of tickets among the students, and in November an election of officers was held, all holders of membership tickets voting by ballot. The officers given above were elected. These officers then drew up a constitution, which was presented to a meeting held in the University Chapel and the greater part of it adopted without change. The Association has during the year raised quite a large amount of money toward paying off the remaining athletic deficit and has generally supervised the control of the Track and Basketball teams, which are the only branches of sport in which the University has been represented during the past year. The Executive Committee has supervised the elections for assistant managers, awarded the athletic insignia in the various branches of sport and elected the managers for the coming year.

The work of the Association is controlled by the Faculty and subject to their rulings. A committee composed of Prof. W. C. Ruediger, chairman; Prof. G. N. Henning, and Prof. H. C. Jones, has direct supervision over all student activities, and are *ex officio* members of the Executive Committee of the Association.

A larger body for the government of the Association and the raising of interest in the several departments is the Athletic Council, which is composed of the Executive Committee *ex officio* and one representative from each one of the departments of the University, together with the managers of each of the teams.

The formation of a new Athletic Association this year was undoubtedly a long step in the right direction, and it is hoped that the number of branches of sport in which the University is to be represented will be materially increased next year.

Class Presidents' Association

LEONARD H. ENGLISH (Med., '13).....	<i>President</i>
HENRY H. SNELLING (Eng., '13).....	<i>Vice-President</i>
ERWIN HARSCH (Eng., '15).....	<i>Secretary</i>
JAMES P. NASH (Eng., '14).....	<i>Treasurer</i>

THE Class Presidents' Association, as should be the case, has been the means of bringing the students and the Faculty of the University in close touch with each other.

The meetings of the association have been frequent, and it has been quick to take up and inaugurate matters which pertain to the good of the University. The campaign inaugurated to wipe out the athletic deficit was prosecuted with vigor by the various class presidents, and over half of the deficit was paid in.

As a means of keeping the Faculty advised of the feeling of the student body and acting as a mutual representative for both student body and Faculty, the Class Presidents' Association is undoubtedly a desirable organization. It can be truthfully stated that the Class Presidents' organization of 1912 has undoubtedly filled this requirement.

The departments are represented by the following gentlemen:

Columbian College—MAXSON, BROWN, WALTON AND BARRETT
Engineering—SNELLING, NASH AND HARSCH
Teachers College—JOHNSON
Medical—ENGLISH, TAYLOR, DONN AND McNALLY
Dental—DUFEE, GOLDEN AND CARR
Pharmacy—WHITTLESEY AND COWLING
Veterinary—COOK AND BROWN

Veterinary Medical Association

DR. JOHN P. TURNER.....	<i>Honorary President</i>
DR. JOSEPH N. HORNBAKER.....	<i>Honorary Vice-President</i>
DR. JOHN M. BUCK.....	<i>Honorary Secretary</i>
WM. A. HOOKER.....	<i>President</i>
HOWARD S. MILLER.....	<i>Vice-President</i>
GEORGE H. GILLETTE.....	<i>Secretary</i>
JOHN J. ESSEX.....	<i>Treasurer</i>
CHARLES W. RIPPON.....	<i>Sergeant-at-Arms</i>

ADVISORY BOARD.

WM. A. HOOKER.....	SAMUEL D. FORBES.....	HARRY J. BIONDI
--------------------	-----------------------	-----------------

ENTERTAINMENT COMMITTEE.

JULIUS E. MORCOCK.....	HOWARD S. MILLER.....	HERBERT H. BROWN
------------------------	-----------------------	------------------

THE Veterinary Medical Association of the George Washington University is a student organization created at a meeting held October 17, 1908, and having for its object (a) the advancement of veterinary science in general, (b) to promote a feeling of good-fellowship among the students of all classes, (c) to create and maintain the spirit of loyalty to our Alma Mater, and (d) to serve as an organ through which the students may communicate with the faculty.

The regular meetings of the Association are held on the second Saturday of each month after the first annual meeting and during the scholastic year. At these meetings papers of scientific interest on live topics are read and discussed by its members, and these are a very beneficial and important factor to a young man entering upon a professional career. These meetings are rendered of particular value to the student members by the usual presence of one or more prominent veterinary practitioners or specialists connected with the various scientific bureaus of the government who present the problems with which the veterinarian has to deal both from practical and theoretical standpoints.

In addition to a number of smokers during the year, an annual banquet is given by the Association, to which the members of the faculty and other distinguished guests are invited, and the occasion is made a joyous and instructive one by the usual prandial and post-prandial proceedings.

The Association, although very young, is a well-established organization; the membership is large and growing rapidly; the student-body realizes the vast amount of good that can be accomplished as is evidenced by the greater and ever-increasing interest which they manifest and the readiness with which every member responds in lending himself to the performance of arduous duties in behalf of its welfare; and it is easy to predict a long-continued and prosperous future for the Veterinary Medical Association of the George Washington University.

University Debate

DR. C. W. A. VEDITZ

EDWARD R. CALLISTER, *Needham*

C. C. ROSE, *Columbian*

FOR the third time in two years George Washington has been successful in the intercollegiate debates, of which Washington and Lee University was the opponent. The success of the George Washington team is all the more remarkable because of the comparatively short time, barely two weeks, which our team had to prepare for the debate. Success of this kind gives an added stimulus to intercollegiate debating, and it is hoped that interest in debating will be enhanced during the next school year. George Washington has a remarkable record in intercollegiate debating. During the year from 1905 to 1907 George Washington participated in six intercollegiate debates without a single defeat. There have been sixteen debates since 1905, of which George Washington won eleven. Probably few universities can present such a record.

One of the strong features of intercollegiate debating is that those participating are eligible for membership in the national fraternity, the Delta Sigma Rho, composed entirely of intercollegiate debaters.

INTERCOLLEGIATE DEBATE

MARCH 15, 1913.

 EDWARD R. CALLISTER

THE Needham Debating Society is an important factor in fostering an interest in debating in the University. Its members always manifest a keen interest in intercollegiate debating. While success in intercollegiate debating is not always a criterion in results accomplished in a debating society, at the same time it demonstrates that the benefits received in taking part in weekly debates put students well in the foreground of efficient debaters and speakers.

In the first intersociety debate of the school year Arthur Wooley, Burr S. Stottle, and Walter E. Barton upheld the contention of the Needham Society. Second honors were awarded to Mr. Stottle. The second intersociety debate was won by the Needham Society. The debaters were Marion S. Tanner, Walter E. Barton and Sam D. Thurman. First honors were awarded to Mr. Barton.

The Society meets Friday evening in the north hall of the Law School.

The Columbian Debating Society

THE Columbian Debating Society, which was founded in 1889, has for its aim the development of the art of debating and public speaking. The students of the University, in all departments, are eligible for membership. It has the largest membership of any debating society in the University, as well as representatives from more departments than any other society. It meets each Friday evening during the school year in the North Hall of the Law School, at which time some question of moment to the public is debated. At the preceding meeting three members of the society are appointed to uphold the affirmative side of the question selected and three to uphold the negative. At the close of the formal debate each other member of the society present is given three minutes to discuss the question upon either side he may choose. Two honor men are selected at each debate, and when six formal debates have thus been held another formal debate is held between the six first honor men selected, and three of this number are selected by the society to represent it in one of the series of three inter-society debates between the Columbian and Needham Debating Societies held each year.

Calendar of Events

1912

SEPTEMBER

- Eighth. George W. Calver, Editor of the CHERRY TREE, resigns.
Eighteenth. Death of Dr. Williston Samuel Hough, Dean of the Teachers College.
Twenty-sixth. Co-ed luncheon held in Girls' Study Room.

OCTOBER

- Second. Malcolm Gordon Slarrow appointed Manager of the Track Team for 1913.
Third. First issue of the 1912-13 *University Hatchet* appears. Suggestion is made for the re-organization of the Athletic Association.
Ninth. Student mass-meeting for the formation of a new athletic association. Manager Gorman issues call for basket-ball candidates.
Fourteenth. Minute and detailed instructions for the guidance and regulation of the conduct of Freshmen appear posted upon the walls of Washington.
Fifteenth. Aforementioned posters are superseded by an eloquent reply in red. Manager Slarrow issues call for track candidates.
Sixteenth. Freshmen put one over. Informal reception tendered by the Sophomores is turned into a massacre by the babies.
Announcement of the course in Architecture.
Seventeenth. Organization of the Glee Club. H. P. Veazie elected leading tenor.
Architectural Club elects William T. Conboye president.
Twentieth. G. W. U. Socialist Club organized.

NOVEMBER

- First. First meeting of Association of Class Presidents. Alvin McC. Brown elected Editor of the 1913 CHERRY TREE.
Fourth. Dr. Wm. Macon Coleman addresses students on "The Meaning of Socialism."
Eleventh. New A. A. organized.
Thirteenth. Freshmen give informal dance in Chapel.
Nineteenth. Howard W. Hodgkins elected president of the A. A.
Twenty-second. Freshmen hold very successful "Prom" at the Raleigh Hotel. One hundred and thirty couples present.
Twenty-eighth. Thanksgiving holidays.

Calendar of Events

DECEMBER

First. Pyramid elects D. C. Smith, Norman Taylor and Maurice Moore to membership.

Seventh. Inter-fraternity smoker at Hotel Continental. Attendance, 150.
Dental Freshmen hold smoker.

Eleventh. Inter-fraternity Association elects Norman Raymond president.

Twelfth. Pyramid holds annual fall banquet.

Thirteenth. Dr. Hodgkins chosen Dean of the Department of Arts and Sciences.
Cosmos Club holds banquet in honor of Dean Munroe.

Fourteenth. Association of Class Presidents reelects L. H. English president.

Nineteenth. Catholic University basket-ball team defeats G. W. U., 43 to 14.

Twentieth. Manager Slarrow announces that Indoor Track Meet is assured.

Twenty-first. Columbian defeats Needham in first inter-society debate.

1913

JANUARY

First. Chemical Society challenges Engineering Society and Architectural Club to a relay race.

Fifth. G. W. U. receives debate challenge from Washington and Lee University.

Seventeenth. Dr. Frank K. Cameron, of the Bureau of Soils, addresses the Chemical Society.

Twenty-eighth. G. W. U. defeats the Maryland Agricultural College, 21 to 14.

FEBRUARY

First. G. W. U. is defeated by Gallaudet College, 38 to 32., in a fast game, Gallaudet winning in last three minutes of play.

Fourth. Engineering Society holds annual banquet.

Seventh. Announcement of organization of Co-Ed Athletic Association.

G. W. U. Track Meet announced for February 22nd.

Preliminary trials for Varsity debating team.

Twenty-first. Chemical Society holds third annual banquet amidst profundity of oratory.

Twenty-second. Sixth Annual Indoor Track Meet.

Twenty-fifth. Howard W. Hodgkins elected Grand Marshal of the Senior Class by Class Presidents' Association.

Calendar of Events

MARCH

- Third. Co-eds participate in Woman Suffrage Parade.
Eighth. Needham defeats Columbian in second inter-society debate.
Fifteenth. G. W. U. debaters defeat Washington and Lee for third consecutive time.
Twenty-sixth. Y. M. C. A. Banquets.
Twenty-eighth. Inter-fraternity Dance held at New Willard.
Twenty-ninth. Alumni Banquet held at Rauscher's.
Law School Smoker at the Continental.

APRIL

- Eighth. Davis Prize Speaking. Kinsell wins first prize.
Fourteenth. Dr. Friedmann demonstrates alleged tuberculosis cure at the George Washington Hospital.
Seventeenth. Basketball "W's" awarded to Noonan, Gore, Kuehn, Murray, Nash, Reges and Gorman.
Nineteenth. Law School Banquet. Vice-President Marshall present as guest of honor.
Twenty-ninth. Pan-Hellenic Society holds third annual banquet.
Thirtieth. Delta Sigma Rho initiates Messrs. Seltzer and Shaw.

MAY

- Sixth. Pyramid initiates Peter Valaer, Henry A. Lepper, Burr S. Stottle, Alvin McC. Brown and M. A. Gore.

SONGS AND YELLS

Georgius Washington

Tune: Yale Boola.

GEORGE WASHINGTON was a fine old man,
He's our Almus Pater-ah;
He lived down on the Po-to-mac
Near to Alexandria.
He lived a great and stormy life
For many, many years,
So to our ex-post facto dad
We'll give three rousing cheers.

CHORUS

Georgius Washington, Georgius Washington,
Primus in pace,
Primus in bello;
Georgius Washington, Georgius Washington,
Et in cordibus
Civium.

George Washington knew a thing or two,
He was a college man;
He built a university
Upon a noble plan.
This Uni. is the real, real thing,
For we are IT, you see;
If dear old George could see us now
How happy he would be.

Rally Song

Rah, rah, rah,
 Old George is on your trail;
Cheer, boys, cheer,
 For George will never fail
Before our war-cry stout
 The bravest heart will quail,
We'll hang one more scalp to our belt to-day.

Rah, rah, rah,

Cheer for the team
 That wears the Buff and Blue:
The Varsity,
 We put our trust in you.
And when you fight we'll know
 That victory is due,
And then we'll paint up the whole town tonight.

Axe

George—Washington,
George—Washington,
Give 'em the axe, the axe, the axe,
Give 'em the axe, the axe, the axe,
Where—oh!
Where—oh!
Right in the neck, the neck, the neck,
Right in the neck, the neck, the neck,
Rah, rah, rah,
Washington.

Locomotive

G-e-o-r-g-e,
G-e-o-r-g-e,
G-e-o-r-g-e,
Washington, Washington, Washington.

Team

Rah, rah, rah,
TEAM.

Sky-Rocket

S-s-s-s-s-, Boom,
Ay!
Washington.

JOKES,
KNOCKS
AND
OTHER THINGS

FOREWORD

In the world's history there have been many jokes, some good, some not so good. We have gained many ideas from other sources; we have had one or two of our own. We present these with the earnest hope that you have not heard more than 98 per cent of them.

ED. KNOCKS

Nothing of particular interest on this page.
The real Dope starts on the next.

Trees of Tradition

The tree on which the harp was hung is withered, I avow.
That was a song our fathers sung; nobody sings it now.

Tradition has a lot of trees for us to reckon with;
The chestnut tree was one of these. Does it still shade the smith?

The tree we bade the woodman spare once had some small renown.
But now I s'pose no one would care if he should chop it down.

But there is one tree we hold dear; for it we're always keen.
The CHERRY TREE from year to year remains forever green.

History in A Modern Picture Frame

or

Who's Who In American History.

Eighteenth century history made to read like a "Jack Rose" special feature article, with a few "Goldberg" illustrations.

George Washington, better known as "Papa George," the guy that put the precedent in president.

Thomas Jefferson, the original "Jeff," the guy who put the "rep" in Republican.

Robert Fulton, "Steamboat Bob," the guy that put the "steam" in steamboats.

John C. Calhoun—"Carolina Cal."

Henry Clay—"Compromising Henry," the guy that put the "con" in Congress.

Andrew Jackson—"Handy Andy."

Benjamin Franklin—"Big Ben," the lightning kid.

John Marshall, the guy that put the "soup" in the Supreme Court.

Robert E. Lee—Levee Lee, known in history as "mam's shufflin' man."

Eli Whitney—often called "Gin Rickey" Whitney, the ragtime cotton man.

Aaron Burr, known to the police as "Aaron the Blood."

Society Note.

If the "Sphinx" winked at the "Pyramid" what would the "Dodo"?

Heard in History

Professor—"What method of capital punishment was most in vogue at the beginning of this century?"

Bright Student: "I believe the guillotine usually took the head."

*And Yet He Expects to Graduate.*

Prof. Hodgkins: "What is the moment of a force about a point?"

Taylor: "The time it takes to get around the point."

Oh Gis!

There was once a young man from Paris
Who persisted in hugging his knis;
Said the girl with a leer,
As she snuggled up neer,
"If you've got to hug something, hug mis!"

He—"I haven't the cheek to kiss you."
She—"Use mine."

Gordon—"Do they call that the Hotel Richmond still."
Howard—"No, they leave off the 'still.'"

She—"Where are you from?"
Mike—"Ireland."
Ike—"Did your parents come from Ireland, too?"
Mike—"No, they're still there."

What did Io die of?
Iodide of Potassium.

Our Maria Jane,
She's gone to the silent hence,
She lit the fire with gasoline
And hasn't ben-zine sense.

*Revised Version*

Why does a chicken cross the street?
To show her pretty silk hose.

Q.—"What are the last thing we take off when we go to bed?"
A.—"Now don't blush, girls; it's just our feet, off the floor."

Proposed sign to be placed outside the "*Hatchet Office*": "Before Entering This Office, Stop, Look, Listen!"

Heard at the Frat House

Chapter Secretary—"I am trying to get up a directory of all members in town, but there are a number of alumni whose addresses I do not have."

Custodian of the Goat-hairs—"Why don't you write for them?"

*That's How We Need You*
(Dedicated to Exams)

As a freezing man needs ice,
As a blind man needs a book,
As a drowning man needs water,
As New York needs a crook.

As Rockefeller needs money
To pay his monthly dues,
As a baby needs tobacco,
Oh, that's how we need you.

*Gre Atsna Kes!*

Whe ne verwer uns hor tofj ok esweh avet or unins tuf fli ket his. No ttha tthe rei san ysen set oitbu titc omesi nhan dyas aspa cef il ler; whi chis allmo sto four do pei sa nyw ay.

Exam. Question: "Why is Marsh gas dangerous?"

Student's answer: "Mixed with air and ignited the reaction is as follows:

If the unfortunate is not killed by the explosion, according to the formula, he is suffocated by the CO_2 and, surviving these, he must surely be drowned."

*One of Professor Mechlin's.*

"The last time I went over the road it was in horrible condition and I have not been over it since."

The motto of the Joke Editor: "Laugh, Damn You, Laugh."

A Medical Alphabet

Appendicitis, you'll agree, will claim the letter A, while
While B's made up of Baths and Bandages each day,
C is the Chart the nurses keep to satisfy all hadns.
D is the Doctor coming in each day with stern commands.
E is the Ether no one loves, and Enemas galore.
F is the Family you long to see as ne'er before.
G is the Gas that chases up and down an empty tum.
H is the Hope that very soon your full discharge will come.
I is the Ice that tastes so good when throats are parched and dry.
J is the Junket, best of all for invalids, say I.
K is the Knack that nurses have with every little touch.
L is the Lonesomeness that makes you wish for home so much.
M is the Medicine, you know, from which each patient shies.
N is the Nurse who seems to you an angel in disguise.
O is the Operating room we all observe with fear.
P is the Palpitating Pulse with every visit here.
Q is the Quiet all about while nurses bring your meals.
R is the Reason for it all, to wit, their Rubber heels.
S is the Sterile Sponge that adorns our poor insides.
T is the glass Thermometer that 'twixt our teeth abides.
U is the Undivided care that patients all require.
V is the Visitors, my dear, that rouse the nurses' ire.
X is for Extra little things you'll find in every part.
Y is the Youthful internes, thrilling every nurses heart.
Z is the over Zealous ones who weep when you depart.

She Came Back

Pretty Waitress—"What makes you look so miserable, sir?"
Customer—"Why, to tell the truth, my wife ran away last night."
Pretty Waitres—"I shouldn't take on about that, if I were you."
Customer—"I don't; but she came back again this morning."

After the Washington and Lee Debate

She (scanning her program)—“I don’t remember which debater was Seltzer.”
He—“Oh, he was the effervescent one.”

First singer: “Aren’t the acoustics horrible?”
Second ditto: “I don’t smell anything.”

“Where were you born?”
“In Ireland.”
“What part?”
“Why, all of me, of course.”

**Familiar Forestry**

The Christmas tree is now debris,
As we regret to know.
All withered now is that green bough
That once was mistletoe.

But boughs still bloom 'mid winter's gloom
To gladden weary folks.
The CHERRY TREE for you and me
Now bears a crop of jokes.

Anybody with a little nerve could get a laugh by calling the Sorority rooms
“chicken” coops, but we haven’t the nerve.

On the other hand we have no hesitation whatever in calling some of the Fraternity
houses wigwams.

*How Times Have Changed*

Professors Mechlin and Starr never used to get to class on time, but this year they
both got there once apiece, amidst the thunderous applause of their respective classes.

Wagner, the great dissector.

Pyrotechnic

"Now they claim that the human body contains sulfur."

"In what amount?"

"Oh, in varying quantities."

"Well, that may account for some girls making better matches than others."

If you would be a good dentist, have lots of patience (patients), and never get down in the mouth.

UNEASY IS THE TOOTH THAT
WEARS A CROWN.

Overheard in the Prosthetic Laboratory: The dentist was about to administer the anaesthetic when he noticed his patient taking out his purse. "Oh, you needn't pay me now, sir," said the doctor. "I didn't intend to; I was just going to count my money." Quick, Slack, the needle!

Who always says "I imagine?" Ask Judge Carr.

The Law School Stock Farm

This song was written by a University student, and sung at the annual Law School banquet. We think it worthy of repetition.

Tune: "Mr. Dooley."

By HERBERT W. CORNELL, '15

There was a man in Washington ;his name was Mr. A,
He had a horse named Black Hawk and he fed it lots of hay;
It lived out at Black Acre which belonged to Mr. B,
Where also lived Gray Eagle which belonged to Mr. C.

CHORUS

The Law School Stock Farm! The Law School Stock Farm!
The greatest place that you have ever seen,
Gray Eagle rambles and Black Hawk ambles,
While Buttercup goes gamboling o'er the green!

Now Mr. B was seised in fee and he did lease to D
A place they call White Acre which adjoined the farm, yu see,
He kept a cow called Buttercup and he was sued by A
Because she trespassed and ate up all Black Hawk's oats and hay.
—Chorus.

Now it appeared that Mr. A went out one summer day
To take his pet horse Black Hawk his apportionment of hay,
And Mr. C says "Pardon me, would it do any harm
To take these oats and give them to Gray Eagle at the farm?"
—Chorus.

But as poor Mr. A that day was just a trifle boozed
He got the bran and oats and hay most tortiously confused,
And Buttercup, she trespassed and she stole that grub away;
Oh, tell us, Mr. Fraser, does her milk belong to A?
—Chorus.

Hurts Their Literature

The English have no CHERRY TREE
In all their field of humor—see?
We call them dull. That's why, mayhap;
For with that out, you leave a gap.

Professor Mechlin announces that his latest invention, "Fireproof Air," will soon be placed upon the market.

**Junior Engineering**

We are proud and never fearing;
Juniors' Engineering.
We're the Class of 1914, and of knowledge we are full.
Oh! There's wisdom and there's prudence
In this bunch of college students,
'Though we will admit that sometimes we throw a little "bull."
With such leaders as Tom Murray,
And Jim Nash, why should we worry,
And get wrinkles in our faces while still so gay and young?
So we'll all absorb the knowledge
We can get in this old college,
And in after years the "profs" will hear our praises loudly sung.

Taylor—"I don't see why they don't lift those copper bars with magnets."
Lift copper with magnets! Gee, isn't that guy the prize simp? But, then, you can't expect anything from a chemist.

*Heard in E. E. 7.*

Prof. Woodward: "What is the function of the oil in an oil switch."
"Red" Smith: "To lubricate the joints."

Can any one inform us why those dear Sororities persist in calling themselves Fraternities?

We thought not; thanks just the same.

Was He Knocking?

Dean Wilbur (to one of the speakers)—“We had better have some music at the Davis Prize Speaking so as to make it interesting.”

Great Discovery!

We have discovered that the CHERRY TREE lies deeply buried in the hearts of the Faculty. Look:

Nutta				Rollo da Walt'
Clink, Ministre d'Anacost'.....				Charla da Swish
Asparag'.....				Dunk da Smit
Pum di Tear.....				Rolf da Hosp
Dick da Cob, Stage Manager.				

The general consensus of opinion is that this opera is the best from the pen of the talented composer, Signor da Stock.

Two of the most brilliant portions of the score are Georga da Bite's Moonshine Aria in the first act, and the beautiful Vacant Area of Henna da Snell' in the death scene in the last act.

The ensemble in the second act between the chemicos, architectos and co-edicos was a powerful pageant of purling and pulsating prisms of primary pigments.

I should worry and get a shape like a ham and be called Swift.

We should worry and skip French and flunk.

Dean Hodgkins (holding up a concave mirror)—“These mirrors are used a great deal by shavers; I don’t use them myself and (glancing at “Brock’s” latest effort) I don’t believe Brockwell does.

The boy stood on the moonlit deck,
His head was in a whirl;
His eyes and mouth were full of hair.
And his arms were full of girl.

As Dean Wilbur might say it:

“In promulgating your esoteric cogitations or articulating superficial sentimentalities and philosophical or psychological observations beware of platitudinous ponderosity. Let your conversation possess a clarified conciseness, a compacted comprehensibility, a coalescent consistency and a concatenated cogency. Eschew all conglomerations of flatulent garrulity, jejune babblement, and asinine affectation. Let your extemporaneous decantings and unpremeditated expatiations have intelligibility, without redomontade or thrasonical bombast.

“Sedulously avoid all polysyllabical profundity, pompous prolixity, and ventriloquical vapidty.”

As we should probably say it:

“Sing your song, son, and don’t throw the bull.”

Tom—“How would you light a cigar if you were out in a boat without a match?”
Jerry—“That’s easy; throw it up in the air and let it light in the water.”

It would be easy to paint a “cubist” portrait of Dean Hodgkins because he’s absolutely square.

A Word to the Wise is Foolish.

Benevolent Despotism

or

THE TERRIFIC TERMINATION OF THE TEMPTING AND TERRIBLE TROT

Time: All the time.

Place: The Deanery.

Will Deanbur.....	A Scollege Dean
Piphi.....	One of a Bunch
Chiome.....	Another One of Another Bunch
Sikap.....	Still Another One of Still Another Bunch
Daisy.....	Aid to the Dean

Imps of Satan are busy spreading their pernicious doctrines throughout the earth, and they have penetrated even into the Deanery. They are seen busy at their infernal work.

Imps (singing):

We have introduced the trot;
We are working quite a lot,
Of evil and of trouble and of strife;
Let us propagate the rot,
And the lives of men besot,
Until we doom to ruin human life.

Terrific thunder and lightning off stage.

(Enter Will Deanbur)

Dean (excitedly): The time's propitious. Heaven seconds me worthy efforts.
(Imps quiver in fear, and seek cover.)

Dean (continuing): Now let the hidden fires of me wrath burst forth, that I may overwhelm and destroy forever this insidious viper that undermines the morals of me fair community. (Pushes button). It shall be done.

(Enter Daisy.)

Daisy (kneeling): O, Dean, live forever! What dost my learned master now require of his faithful servant.

Dean: 'Tis well. Have in that faltering infant, misguided in her path.

(Exit Daisy.)

Dean: Now let me muster all me vigor.

(Enter Piphi, in fear and trembling)

Dean (after a pause, during which flashes of liquid fire dart from his terrible eye and play around the head of the wretched Piphi): Answer me truly child, lest annihilation beset you. Knowest thou aught of tangos?

Piphi (trembling): My lord, most noble Dean, of tangos know I little; yet—

Dean (in stern wrath): Enough! Thou knowest all too much! Even now thou art in the throes of that most iniquitous of Satan's wiles.

Piphi: Oh! Learned master—

Dean: Have done, unfortunate wretch. The gates of Hell yawn in thy way. Turn back thou faltering, one, turn back e'er thou hast gone too far. This tantalizing tango, this tempting trot, these writhesome, wriggling machinations of infernal powers must cease. Thou hearest! Humanity demands that I, out of me honest self, must rescue thee and thy misguided sisters from the toils. So goeth the mandate forth, and so must thou obey while yet thou art in service within these hallowed walls.

Piphi: But hear me, lord—

Dean (in exasperation): Hear thou me. An com'st it yet again within me ken that thou and thy companions do, in contravention of me will, once more indulge in this abhorred dance, thy charter, goods and house shall to this Deanery be confiscate.

Piphi: Oh, honored—

Dean: 'Tis said. Thou hast me word. GO!

(Exit Piphi, wailing off Stage.)

(Enter Chiome and Sikap, bowing deeply.)

Together: Oh, Holy of Holies, hear us.

(Crash of Thunder.)

Dean: No word! Avaunt! (Exist in fear Chiome and Sikap. Chorus of wailing.)

Dean: 'Tis done. I rest content. (Exit, while the colored light through the window of the Deanery plays upon his forehead.)

(Imps come out from hiding places, only to droop and die before the sunlight.)

Imps (dying, sing):

We have done our evil best,
But we could not stand the test
Of the virtues of this upright Deanery;
We lose our naughty zest
At his fearful, stern behest,
And we die in awful torment at his knee.

(Curtain.)

Freshman Pharmacy Horoscope

Edward Vivian Dunston, Professor (in absentia) of Hydraulics, etc.

The Ball of the Bacteria

A gay Bacillus, to gain him glory,
Gave a ball in the G. W. laboratory.
The fete took place in a cover glass,
Where vulgar germs could not harass.
None but the cultured were invited,
(For microbe cliques are well united),
And they tightly closed the ball-room doors
To all the germs containing spores.
The Staphylococci first arrived—
To stand in groups they all contrived.
The Streptococci took great pains
To set themselves in graceful chains,
While somewhat late, and two by two,
The Diplococci, came in view.
The Pneumococci, stern and haughty,
Declared the Gonococci naughty,
And would not care to stay at all,
If they were present at the ball.
The ball began, the mirth ran high,
With not a thought of danger nigh.
Each germ enjoyed himself that night,
With never a fear of Phagocyte.
'Twas getting late (and some were loaded),
When a jar of Formaldehyde exploded,
And drenched the happy dancing mass,
Who swarmed the fatal cover glass.
Not one survived, but perished all
At this Bacteriological Ball.

Dedicated to Henry H. S.

How I love its giddy gurgle,
How I love its fluid flow
How I love to wind my mouth up,
How I love to let it go.

A gravedigger dug a grave for a man named Button. The bill he made out read,
"To one Button hole, \$4.00."

First Stude—How near were you to the right answer to the fifth question?
Second Stude—Two seats away.

Waiter, I ordered pork and beans; where is the pork?
Right behind that bean, sir.

What would you rather do: take French or die a natural death?

Miss Leila Scott, she was so thin,
As thin as thin could be;
She often hid behind a pin,
So thin a girl was she.

We Are Sure This Was Not Prof. Smith.

First Stude—That Professor gave me D; what did he give you?
Second Ditto—He gave me H—.

Ain't it the Truth

The very worst habit
To get in your head,
Is to send girls flowers
Before they are dead.

Why is it that everybody is willing to start things and nobody wants to finish them?

Once they called it hot air but now it's bull con.

Apropos of Exams.

"Hair hung and breeze shaken over the mouth of hell" is right. We should worry.

Diphenylamine and Chlor-benzene
Are as deep, as deep can be—
But nevertheless they're a hell of a mess.
So give me the deep Blue Sea.

"Oh, Hell," said Dean Wilbur, as he noticed the Freshmen posters on the Chapel walls.

Dedicated to A. McC. B.

I want to be tough
And smoke and chew;
I want to run around at night
Like other boys do.

Not Necessarily Insinuating Anything.

Smith—How is it that McNally so readily identified the odor of H_2S ?
Jones—He once acted in Virginia.

Recipe for Success.

Late to bed
Early to rise,
Hustle all day
And Advertise.

Wouldn't you die laughing if Dean Hodgkins should tie his whiskers with pink ribbon?

The Rampage of the Frosh

Now come all you sub-Freshmen
In your kilties and your sash,
And attend your baby earlets
To a story with a dash.

From the purlieus of the prep school
Came a young, inquiring throng,
Bursting o'er with verdant freshness
Lacking evil, lacking wrong.

In the ways of college wisdom
They were innocent and free—
Learned upper-classmen
Winked their bright eyes in glee.

They bethought them of tradition
From the hoary ages old,
Of the Freshman and the Sophomore,
In encounter waxing bold.

Thus in history runs the story:
Each year must the classes meet,
Each year must the Sophomore conquer,
Must the Freshman meet defeat.

And so the noble Sophomore,
When he saw the Freshman crew,
He slyly winked his wicked eye—
But the Freshman winked his, too.

And now in solemn conclave,
The Freshman clan convene,
And solemnly deliberate,
Protected by the Dean.

And there in wisdom potent
They chose a mighty man,
Whose christian name was Samuel,
To lead the youthful clan.

And having cast their ballots,
Straightway they did adjourn,
And counsel took, so that the Soph
A lesson good might learn.

They took their little coats off,
And they turned them inside out,
So that they would not be besmirched
In turmoil of the bout.

And then they issued from the hall;
And with a lusty cry,
They rushed upon the Sophomore,
To conquer or to die.

Undaunted by the water
That poured down from above,
They clasped the Sophomore round the neck
As taught by brother love.

They clasped the Sophomore's Cluett,
And they threw him to the ground.
A cheering throng of fairer Frosh;
Admiring, stood around.

Then having thrown the Sophomore,
Each and every pup,
They took the powerless Soph's own ropes
And tied the Sophomore up.

In triumphing procession,
Took every mother's son,
And vaunted of their prowess to
The streets of Washington.

And while the city rumbled
With Freshman cheer on cheer,
The tied-up Sophomore hungered for
His pretzels and his beer.

Late that night they left them
In dismal gloom dismayed,
To vow they saw their error clear
In planning such a raid.

And when the years have written
The 'Varsity's last page,
The record of this fray will live
To echo down the age.

At the Freshman Ball.

Shades of Ampere!

Why do they use alternating current for elevators?
So they can run both ways.

Soph—Have you ever taken cocaine?
Fresh—No; who teaches it?

*Dean Hodgkins.*

Freshman RESPECT and fear him.
Sophomores RESPECT and admire him.
Juniors RESPECT and revere him.
Seniors RESPECT and love him.

A wonderful bird is the pelican,
His bill holds more than his belican.
He keeps in his beak
Enough for a week,
I don't understand how the helican.

Apopos of nothing at all, how do you like the way Mech teaches * his class?
Neither do we.

Heard all over G street during a Sorority meeting—"O, girls, isn't he—she said—
then I said—he said—she said—don't like his hair. They said—he said—but I said—"
and so *ad infinitum*.

*Poetic license.

WAR! WAR! WAR!

10,000 LIBEL SUIT

PROMINENT PROFESSOR ENTERS SUIT AGAINST HATCHET

Produces Scores of Reputable Witnesses

Prof. Mechlin this evening positively denied that the recent statement in *The Hatchet* has any foundation whatever, and branded it as a malicious and unqualified falsehood.

A recent issue of *The Hatchet* stated:

"Prof. Mechlin was this afternoon busy at work upon the preparation of his final exams."

Following this announcement of our esteemed contemporary, a representative of THE SCREAM immediately interviewed Prof. Mechlin. The Professor showed signs of intense anger when told of this libellous attack, and hissed through his clenched teeth: "This is preposterous. I have never done a stroke of work in my life."

He immediately filed suit for \$10,000 against *The Hatchet*, and will produce scores of witnesses from among his classes to prove his innocence.

GERMAN PROF. OFFERS TO WAGE SIX KEGS OF FINEST DEUTSCHER

War Will Be Declared With Japan Within Two Hours

Our war correspondent has received this positive information from a prominent military expert. He has requested that his name be kept from the public, but his statement is as follows:

"The National Government is at this minute straining its utmost resources to put the entire Army and Navy into the field at once. War will be declared within two hours. The first division of the Japanese fleet is under steam for the Pacific Coast. The State Department is in a turmoil. The Army is at present under forced marches, while the Pacific Fleet has sailed under sealed orders."

This news contributed by Prof. Schoenfeld. He offers to bet six kegs of finest Deutscher brew that there will be some basis to it in the near future.

BEAUTY COLUMN

Edited by Mlle. Fletcher Tilton.

Dear Mlle. Tilton: I was once svelte and graceful; now I am fat and dumpy. How can I become slim again?

Howard W. H.

You are drinking too much. Keep away from Riker's drug store.

Dear Mlle.: How can I raise one of them cute little mustaches like Prof. Starr's?

J. Brockwell.

I have found molasses and pumice stone very effective and can recommend it highly.

Dear Mlle. Tilton: Will you please give me a recipe by which I can grow a pompadour?

George Baston.

Dear George: It can't be done.

Dear Mlle.: I am very desirous of giving the University some piece of beautiful statuary as a testimonial of my regard. Can you suggest some subject?

X. A. E. M. Veditz.

I should suggest either Jack Johnson or Ernst Gerstenberg as being beautifully adapted for this purpose.

WHISKERS CLUB ELECTS

At a meeting of the Whiskers Club last night the following officers were elected: H. L. Hodgkins, Grand Exalted Feather Duster; A. F. W. Schmidt, Sacred Illustrious Whisk Broom; G. P. Merrill, Lord High Scrubbing Brush; C. S. Smith, Ohowit Tickles.

DARING ROBBERY

Prominent Assistant Professor Victim of Base Attack

Mr. Harry W. Thompson, Assistant Professor of Chemistry, was last night the victim of a daring hold-up. His story, as told to Capt. Doyle, of the Ninth Precinct, is as follows:

"Last night I was going home with a very valuable packet of Chemistry papers. As I was passing the Hotel Powhatan, a masked man sprang from the shadow of a tree and covered me with an automatic, while he snatched the bundle from my pocket. He then sprang upon a passing Pennsylvania avenue car headed toward the Navy Yard."

Detectives are today investigating this daring robbery. Captain Doyle pronounces it one of the most mysterious crimes of which he has ever known.

Prof. Thompson states that the papers were very valuable, being answers to the thirteenth set of questions propounded by Dean Munroe. Their value is attested by the fact that he was about to give them all 100 per cent.

BULLETIN OF THE ENGLISH DEPARTMENT

Dean Wilbur has announced that for next year the following books will be studied in his course of Humane Studies of English Literature:

Congressional Record; Casey at the Bat; Henty, One of the 28th; Autobiography of Gyp the Blood; Excerpts from the New York Journal; Joe Miller's Joke Book; Bret Harte, the Heathen Chineese; Mother Goose; Complete Adventures of Mutt and Jeff; Eva, the Beautiful Telephone Girl; The Ring Career of Bill the Bite; Epitaphs of Famous Men; Diary of Aristophanes; History of THE CHERRY TREE; Philosophic Studies of African Literature; Life-Cycle of a Hot Tamale.

WANTED

WANTED—Invitations to Congressional dinners and dances by well-dressed young man; charming conversationalist, good manners, very swell; best of references from sororities and seminaries. Address Ralph H., Brookland, D. C.

WANTED—\$100 to keep me out of jail; answer immediately. L. A. Hughes.

WANTED—One Diploma; must be well supported by French credits; will pay good price. Henry H. S., Patent Office.

WANTED—Young man just out of college, handsome, good bluffer, wants engineering work; must have Saturday afternoons off; salary no object; willing to start at \$3,000. Call at 1308 Thirteenth street, after 10.30 a. m. M. Gordon S.

FOR SALE

FOR SALE—Miscellaneous collection of feminine trinkets, pictures, locks of hair, etc.; have no further use for same; will sell cheap. Howard W. H., 1830 T street (until August).

FOR SALE—Excellent cow, gives three gallons of milk daily; also good piano. A. McC. B., Berwyn, Md.

FACULTY ANNOUNCEMENT

The Trustees of the University are taking the final steps in the organization of another department to be known as "The Capital College of Buhl Slinging," and offering a four-years' course leading to the degree of B. S.

The Faculty tentatively selected is as follows:

Harold Keats	Dean
Henry Alphonse Lepper	Professor of Bygology
Louis Lodholz	Professor of Pro.
M. A. Pozen	Professor of Con.

Dean Keats is well known as the author of "How to Sell Books by Buhl Slinging," "The Value of Buhl in Business," and many other bully books. It was only through the personal appeals of the highest University officials that Mr. Keats was persuaded to give up his lucrative publishing business to accept the office of Dean. We congratulate the University on the acquisition of Dean Keats. He is the man for the place.

Professor Lepper is Washington's foremost exponent of Bygology, and as such needs no further introduction. The institution is indeed fortunate to obtain his services.

Professors Ludholz and Pozen are nationally famous as a result of their series of joint debates before the G. W. U. C. S. Both of these men are preeminent in their respective lines of Buhl, and their courses should be among the most valuable ever given at the University.

The addition of this college will fill a long-felt want, and shows a progressive policy on the part of the Trustees which is indeed gratifying to all who have the welfare of the University at heart.

COMING!

COMING!

At the Minstrel Show

Ta—ra—ta—ta—ta—ta!

Gentlemen, be seated. Boom!

Interlocutor: "Gentlemen, I am glad to see we have a full house tonight. It reminds me of those little games in the *Hatchet* office.

Mr. Holmes, have you anything to say to us this evening.

Mr. Holmes: "Yes, sah; ah has a conundrum to propound. What am the point of similarity between a whistling sailor and the George Washington University?"

Interlocutor: "What is the point of similarity between a whistling sailor and the George Washington University?"

Mr. Holmes: "Yes, sah."

Interlocutor: "I give it up; what is the point of similarity between a whistling sailor and the George Washington University?"

Mr. Holmes: "They is both trying to raise the wind."*

Interlocutor: "Mr. Taylor, what have you to say for yourself?"

Mr. Taylor: "Ah has a conundrum, also. What am the difference between a piece of real estate in a famous Dutch city and Sociology?"

Interlocutor: "What is the difference between a piece of real estate in a famous Dutch city and Sociology?"

Mr. Taylor: "Yes, sah."

Interlocutor: "I'm afraid I'll have to give it up. What is the difference between a piece of real estate in a famous Dutch city and Sociology?"

Mr. Taylor: "One am a Rotterdam lot and the other am a lotterdam rot."

Interlocutor: "Mr. Charles Sidney Smith will now sing that pathetic little ballad entitled, 'I was present at the Jubilee when Brockwell raised his Beard.'"

Curtain.

*Contributions may be mailed to the Treasurer.

What is the most deadly poison?
An airship; one drop kills.

No collection of so-called jokes would be complete without an example of the world-famous case of Willie versus Dynamite. We submit the following variation as our 1913 model:

Willie found some dynamite.
Didn't understand it—quite.
So investigated he
And then his fond parents spent numerous days looking for
the remains.

What is rarer than a day in June?
The answer is, a red-haired coon.

It's Easy to Spot 'Em.

Taylor is class editor for the CHERRY TREE. Anybody could tell that by looking at his write-ups.

And it so happened that the King went unto the lion's den and spake, saying,
"Daniel, come forth!"

But Daniel came fifth!

Whereupon the drinks were on the King.

A bird in the hand is worth two in the CHERRY TREE.

"Chappie": "Ah there, chicken."

She: "I may be a chicken, but I'm not picking up worms."

✦

He who knox laste, knox beste.

✦

Balkan War Song.

Hurrah, hurrah, we'll sing the jubilee,
Hurrah, hurrah, the flag that sets us free;
So we'll sing the chorus from Zxcnkqvif to the sea,
While we go marching through Skypogwofzixmifquobjifpof.

✦

✦

Isn't that inter-Sorority association a Pan-Hell of a thing?

✦

Well, Hardly.

"Prexie" (gazing with astonishment at the Freshman posters on the College walls):
"Nothing like this would have been permitted at Annapolis."

The World's Most Important Events

Compiled and arranged exclusively for THE CHERRY TREE by C. Clinton Swisher, Professor of History in the George Washington University.

6000 B. C., March 15th. The Ancient and Accepted Order of the Mystic Adepts of the Sacred Art of Alchemy founded by Hermes Trismegistus.

5657 B. C., June 29th. The last trilobite commits suicide at 4:30 p. m.

4241 B. C., Ides of August. The Right Royal and Secret Order of the Sacred Dodo founded by Menes the Great at the University of Cairo.

4000 B. C. Noah makes a speed record of a thousand miles in some months in his motorboat "Ark."

3001 B. C., March 3rd. Physics invented by Satan.

400 B. C., June 21st. Bull con invented by Socrates.

57 B. C., June 15th. Julius Caesar attends George Washington summer school.

1492 A. D., February 14th. Columbus makes the founding of George Washington University possible.

1142 A. D., July 21st. Richard Coeur de Leon kills four wops in five minutes, breaking his own world's record.

1603 A. D., October 3rd. Queen Elizabeth loses her teeth in some taffy.

(Ed. CHERRY TREE: What became of them?)

(Ed. Knox: How in Georgetown do I know?)

1572 A. D., August 6th. Bill Shakespeare sent to the island for poaching.

1768 A. D., September 29th. Great-great grandfather of Knox Editor makes these jokes possible by coming over from Ireland.

(Ed. Knox: A base libel.)

1893 A. D., January 11th. Paul Bushnell born.

1893 A. D., January 12th. Bush evades his nurse and visits Ebbitt House for the first time.

1912 A. D., November 5th. Election night. Hicks laps up a few.

1913 A. D., January 9th. Pat Murray shaves off his mustache.

1913 A. D., January 10th. Pat Murray catches cold and begins to raise another mustache.

1913 A. D., February 10th. Harsch comes to Calculus class on time.

1913 A. D., February 21st. Dean Hodgkins reported doing well although suffering severely from shock.

1913 A. D., February 24th. "The George Washington Limited" taken off by the Herdic Company.

1913 A. D., March 4th. Our neighbor, W. H. Taft, moves away from here.

1913 A. D., April 14th. D. A. R. Congress opens. Many beautiful femmes. Many handsome(?) doorkeepers.

The System

A Drama in one Dram.

Schoenmann Hernfeld.....A German Professor

Mr. Smith..... Mr. Jones..... Mr. Brown.....	}Students(?)
--	---	------------------

Professor Hernfeld (seated at desk, smiling benignly on students)—Gentlemen, we have today that beautiful little sentiment from Romeo and Juliet. Mr. Smith, you may begin, in German.

Smith—Kerzunk—er—that is, chug-a-lunk, gazoo—I mean—und kerswish—er—geschnitz gervesen worden sein.

Professor Hernfeld—Horrible! (Reads passage with great expression, gesticulating with eyeglasses.) Ah, that is indeed beautiful. Mr. Jones, you may translate.

Mr. Jones—Er—ah—um—er—and the—er—poor—ah—er—I haven't got this far, Professor.

Professor Hernfeld (getting up from desk)—“And the poor girl was driven from home by her stepfather.” Very good. Mr. Brown, you may take the next, in German.

Mr. Brown—Dos haus—er—kerzowie geblutch is—that is—ist—er—fein—I mean sein henkerheimer kerflam—

Professor Hernfeld—Awful! This is indeed terrible! (Business of walking up and down and shaking his head; hands behind back.) Gentlemen, I do not blame you; my own son is just the same. (Pauses dramatically, holds eyeglasses at arms length.) It is the fault of the schoolma'am; it is the fault of our meeserable school seestem. Ah! What is this country coming to?

(Slow, sad music.)

Curtain.

The sweetest words of tongue or pen: "Prof. Henning will be unable to meet his classes today."

Prof. Veditz: "The nearest beer saloon is at Twenty-first and Pennsylvania Avenue, so far as I know. If there is one nearer please inform me."

Why Mr. Holmes will never wear wings: "Tuition must be paid monthly in advance."

*Why Engineers Go Crazy.**

$$H = \frac{Pp^2 [\sin^2 a_1 - \sin^2 y - 2 \cos a_1 (a_1 \sin a_1 - y \sin y - \cos y + \cos a_1)]}{2p^2 (a_1 - 3 \cos a_1 \sin a_1 + (2 a_1 \cos^2 a_1) + \frac{2a_1 \text{Icos } a_1}{A})}$$

The train it is a wicked thing,
The engine smokes all day,
It drags along the Choo Choo cars
And tanks up by the way.

How to Commit Suicide.

Read these jokes and laugh yourself to death.

Bookdealer—Buy a translation and save half your work.
Bright Student—Gimme two.

Editor's Note.

If you like this book, tell others; if you don't, keep it to yourself, for something must be wrong with you.

*Also why composers die young.

Advance Sheets from Prof. Swisher's Dictionary of the
English Language

- BLUFF—To fool, to deceive; especially with regard to recitations. No corresponding word in French vocabulary.
- BONE—To plug; to stuff one's bean; used particularly with regard to exams.
- BOOB—A person who insists upon doing idiotic things; e. g., one who tries to bluff Prof. Henning. Cf. simp.
- BOOK—A compendium of things we don't know.
- BULL—A minimum of thought expressed in a maximum of language; mere vapid verbiage.
- CUT—To be absent from class; to leave, to beat it, to make one's getaway; French cut is likely to cause complications. Cf. skip.
- EXAM—A semi-annual horror, used for the purpose of demonstrating what you don't know.
- FLUNK—A serious disease, very prevalent in January and May.
- FLUNKER—An habitual victim of the above disease.
- GRADUATE—To leave college by the attic door; recommended by the profs as the most desirable mode of egress. See quituate.
- PONY—A vehicle to protect oneself from the flunk disease. See exam.
- PROF.—An ordinarily harmless critter; becomes very virulent in January and May.
- QUITUATE—To leave college without the trouble of climbing to the attic; much in favor among flunkers.
- SIMP—One who is simple-minded; a dippy but harmless individual.
- SKIP—To cut; foreign word used only by freshmen and high-school students.

In the Dodo Cage.

"I think, dear boy, you are a nut,"
Said Howard Hodj to Donald Dut.
"There's other nuts in this here lodge,"
Said Donald Dut to Howard Hodj.

A Whaler.

There was a boy named Taylor,
Who wanted to be a sailor,
So when over the bar
Hove a schooner's spar,
He stuck out his right hand to nail 'er.
